LEGISLATIVE.

The following Report of a Select Committee, together with the Bill as settled by them, was presented to the Council of the Governor-General of India for the purpose of making Laws and Regulations, on the 13th April 1865:—

REPORT.

We, the undersigned, the Members of the Select Committee of the Council of the Governor-General of India for the purpose of making Laws and Regulations, to whom the Bill for consolidating and amending the Laws relating to the Procedure of the Courts of Civil Judicature in British India, together with the communications noted in the annexed list, was referred, have the honour to report as follows:—

We have carefully revised the Bill, and have adopted a large number of the suggestions contained in the communications above mentioned.

Before entering into the details of our revision we may premise that the alterations which we have made are to a great extent verbal, and that, with very few exceptions, they do not affect the general or fundamental principles of the Bill as introduced.

The most important alterations involving questions of principle are in the Sections relating to the specific performance of contracts, and in the part of the Code relating to Reviews of Judgments.

We have provided that specific performance shall not be decreed of any contract, the complete performance of which is necessarily extended over a longer period than five years. When any such contract shall have been entered into before the passing of the Act, we propose that specific performance shall not be decreed for more than five years from the date of the decree.

We have altered Sections 131, 132, 133, 134 and 135*(a)*, and confined their operation to suits brought to enforce the specific performance of registered contracts. For the procedure to enforce the *ex parte* order given under Section 133, we have provided that, on proof of service of the order, the Court shall receive the plaintiff's evidence, and, subject to certain conditions, pass a decree for specific performance. The conditions prescribed are these:—that the consideration is adequate; that the contract is reasonably certain; that the defendant is able to perform it, and that the performance will not impose extreme or immoderate hardship upon him. We have thus, we trust, met the objections of those who fear that the power of enforcing specific performance of contracts by the attachment of the property and the imprisonment of the party guilty of the breach of contract, may be used as an instrument of oppression. We have enabled the Court to decree damages in the event of the contract not being specifically performed, and provided for the execution of the decree.

The power given to the Judges of the subordinate Courts of reviewing, of their own authority, orders passed not only by themselves but by their predecessors, or by Judges for whom they are merely officiating, has, we understand, led to considerable abuse, and the Committee are strongly of opinion that the opportunity for this abuse should be taken away.

Under the Code as it now stands, many orders passed in execution of a decree are not open to appeal. It has been suggested that in such cases

---

(a) The numbers in this Report refer to those of the Sections of the Bill as introduced and published in the *Gazette of India* for 29th April 1864.

either an appeal or a review of judgment should be allowed.

We have thought it better to adopt the latter alternative, subject to the proviso, which we propose should extend generally to reviews, that, when the review is granted by a Court subordinate to a District Court, it shall be with the previous sanction of such Court, and that, when granted by a District Court, it shall be with the previous sanction of the High Court.

We have armed the Civil Courts with power to punish witnesses for failing to attend when summoned, instead of leaving the cases of persons so offending to be dealt with by the Criminal Courts. The necessity for this provision in order to the due administration of justice has been strongly pressed by many Judges, some of them of long standing and of considerable experience.

We have introduced several changes in the Chapter relating to the High Courts, and exempted those Courts from the operation of some Sections, which, however well adapted to Courts in the Mofussil, have been found unnecessary and, in some instances, inconvenient in the High Courts with their superior judicial agency.

We will now specify some of the minor additions and alterations which we have thought necessary.

We have added definitions of 'Person,' 'Section,' 'Chapter,' 'Law,' 'Judgment,' 'Decree,' 'Immovable Property,' 'Movable Property,' 'Bond,' 'Document,' and 'Subordinate Court.'

We have inserted a clause analogous to Section 3 of the Bill as introduced, providing that the Sections to which the letters 'R. C.' are affixed, shall extend to Revenue Courts.

We have provided that every person shall be entitled to sue except persons expressly prohibited from suing by any law. Executors and administrators, trustees of express trusts, and next friends of lunatics and idiots may, on obtaining the permission of the Court, sue without joining with them the persons for whose benefit the suit is brought. Infants will sue by guardian or next friend, who will be admitted and may be removed by the Court, and who may be made liable for the costs of the suit. We have also provided that an infant defendant shall appear by guardian.

To Section 10 we have added explanations after the manner of the Indian Penal Code and the Indian Succession Act, 1865, as to the place in which a cause of action may be held to have arisen: as to the dwelling necessary to give jurisdiction: as to the place in which a Corporation or Company shall be deemed to carry on business; and as to the business contemplated in the Section. To Section 61 we have added an explanation of what shall be considered to constitute residence out of British India. We have also given explanations as to the adequacy of consideration and the certainty required for enforcing specific performance of a contract.

We have introduced Sections declaratory of the tribunal in which suits not for immovable property, shall be brought against the Secretary of State, the Government of India and the local Governments.

We have provided for the subscription and verification of the plaint in suits by Government or the Secretary of State.

We have extended Section 24 (as to declaratory suits) so as to enable the Court to make declarations of future rights, and to empower a trustee to obtain a declaration of the respective rights of the persons interested in a trust-estate. We have provided that no Court shall make any declaratory decree or order unless it could, if required, act upon it by giving consequential relief.

The extension of Railway communication has induced us to add to Section 73 a second exception to the rule that no party resident more than fifty miles from the Court shall be ordered to appear in person. We have provided that if Railway communication exist between the place where the party reside and the place where the Court is held, or within a convenient distance from such places, the Court shall have a discretion as to making such order. A similar addition has been made to Section 280.

On the issue of a Summons for final disposal, the parties will be required to produce their witnesses on the day fixed for hearing the suit; and we have provided a procedure where the Court cannot give judgment at the first hearing.

When the defendants are partners, and the suit relates to a partnership transaction, service on one defendant for himself and the others will be sufficient.

When the defendant fails to comply with an order under Section 113 to give security for his appearance, we have provided by express words that the Court may commit him to Jail.

We have added a clause to Section 120, providing that the Court, if satisfied of the plaintiff's inability to furnish the specification and valuation required by that Section, may dispense therewith.

We have provided that an award of compensation for arrest or attachment on insufficient grounds, or for the needless issue of an injunction, shall be executed like a decree for money.

A Notice to produce documents when served on a party to a suit will, if the Court shall so order, have the force of a Summons.

We have altered Section 163, so as to enable the Court, when the defendant fails to appear, to dispense with strict proof of the service of the Summons; and we have provided that, if the Summons shall have been issued for the final disposal of the suit, the Court, if satisfied of the justice of the plaintiff's claim, may proceed to pass a decree in his favour *ex parte*. The written declaration

(mentioned in Section 173) in support of the cause shown for failure to appear will now be on stamp-paper where a stamp is required for petitions.

As a preliminary to setting aside a decree *ex parte* in a suit involving a claim to money, we have considered it right to require the amount with costs to be paid into Court.

We have provided that, in the case of any party failing to present a written statement called for under Section 183, the Court may pass a decree against him, or make such order in relation to the suit as it may deem proper.

In order to bring the Code into harmony with the Stamp Act (X of 1862, Section 15) we have made the penalty payable on the reception of unstamped or insufficiently stamped documents treble, instead of double, the amount of the stamp duty or additional stamp duty which it should have borne.

We have added a proviso to Section 217 that when the hearing of evidence shall have once begun, the hearing of the suit shall not be adjourned at the application of any of the parties, except from day to day, when all the witnesses cannot be examined on the same day. Great encouragement has been given to perjury and subornation of perjury, and other serious irregularities have arisen, in consequence of the facility hitherto enjoyed of obtaining adjournments, especially in the hearing of evidence.

We have provided a procedure where cases, in which a District Court shall have given an opinion under Section 245 on the law of the religion or of the established customs of the parties, shall come on appeal before such Court.

We have made provision in Section 266 for the Judge's temporary inability to take down evidence as required in that Section.

We have empowered the Court to appoint any Government Officer with the consent of his immediate superior to be a Commissioner to make a local investigation.

We have provided a procedure *ex parte* when the parties do not appear before the Commissioner.

As to costs, we have provided that, at the time of disposing of any application, the Court may award to either party the costs of such application, or reserve the consideration of such costs for any future stage of the proceedings. We have further empowered the Court to set-off costs payable to one party by another against a sum which the former shall admit to be due from him to the latter. We have also provided that the Court may give interest on costs at six per cent., and direct that costs, with or without interest, be made a charge on the subject-matter of the suit. In case of the plaintiff's bankruptcy or insolvency, we have provided that the Court may award the defendant's costs to be recovered out of the plaintiff's estate; and, where the plaintiff withdraws from the suit without permission, he will be liable for such costs as the Court shall award. We have given the Courts power, in rejecting a written statement and on re-admitting an appeal dismissed for default, to impose terms as to costs or otherwise.

We have by express words empowered the Courts to appoint the Assessors mentioned in Sections 298 and 299, and we have thought it inexpedient to require that the opinions of the Assessors shall always be given orally.

We have empowered the Court, with the consent of the parties, to put any of them or any other person on his oath or affirmation, and to decide the suit on the statement made under that sanction.

We have provided that, if the judgment in suits in which a regular appeal is not allowed be written in English, it shall not be necessary to translate it, unless any of the parties require a translation. In like manner the judgment of the Appellate Court need not be translated unless any party shall so require.

The judgment of a Court of Small Causes will not be required to give the reasons for the decision.

We have provided for the execution and, if necessary, the alteration of the conveyance or endorsement tendered under Section 327. We have also provided for the case of the Judge agreeing to a conveyance going beyond the terms of the decree, or refusing to agree to a conveyance in conformity with those terms.

A warrant for arrest of the defendant will direct the serving officer to bring him before the Court.

In Sections 369 and 400 we have authorized the immediate sale of perishable commodities.

Where there is a mortgage or lien on the attached property, we have provided that the attachment shall continue subject to the claim of the mortgagee or person entitled to the lien.

If the decree-holder purchase at an execution sale, we have provided that the amount of his decree may be taken in payment, in whole or in part, as the case may be.

As regards the enforcement of registered Bonds, we have provided that the obligee of a bond payable by instalments may sue before all the instalments shall have become due. We have also provided that the representative of a deceased obligor may plead that he never received any assets, or that they have been paid away, or that they are insufficient.

In Section 512 we have added to the grounds of setting aside an award—either party having fraudulently concealed any matter which he ought to have disclosed, or having wilfully misled or deceived the arbitrators or umpire. The Section

as it stood provided for setting aside an award on the ground of misconduct, only when a charge of such misconduct was established against the arbitrators or umpire. As observed by the Madras Government, this renders such charges more frequent than they would otherwise be, and the probability of being exposed to them makes respectable men unwilling to arbitrate.

We have given a regular appeal in respect of costs alone, provided that it shall appear upon the face of the decree or order that the Court below proceeded upon a mistake or misapprehension.

We propose that on appeal the Courts should be required, of their own motion, to take cognizance of defences founded on lapse of time, breach of the Stamp laws or want of jurisdiction.

A respondent taking objection to the original decree from which he may have preferred no cross-appeal, will have to give seven days' notice in writing of such objection.

We have added to the grounds of special appeal, failure by a subordinate Court to determine an issue of law or usage having the force of law, and error in the opinion given by the District Court on a question of religious law or established usage or custom.

The Advocate's certificate endorsed on the application for a special appeal or for a review of judgment, will be required to specify by their numbers which of the grounds he considers well founded and sufficient.

We have given the High Court power to call for the record of any case decided by a Court of Small Causes, or, on appeal, by any subordinate Court, in which no appeal shall lie to the High Court, if such Small Cause Court, or such subordinate Court, on hearing the appeal, shall appear to have exercised a jurisdiction not vested in it by law.

We have omitted the Section empowering the Courts to return the stamp duty paid on an application for review.

In the Chapter on High Courts, we have omitted the provision contained in Section 629 as to suits against the representative of a deceased person on a cause of action which accrued against the deceased in his life-time. We have also omitted Section 632 as unnecessary.

In a Division Court, if the Judges shall be equally divided, the opinion of the Senior Judge will prevail.

We have extended the power of reference given by Section 640, so as to enable the matter to be investigated by the Registrar or other proper Officer of the High Court, and we have declared that any act not of a judicial nature which the Code requires to be done by a Judge, may be done by the Registrar, or such other Officer as the Court may direct.

We have declared that in suits coming before the High Courts in the exercise of their ordinary original jurisdiction, Attornies may obtain and serve summonses.

We have provided that nothing in the eighth Section shall debar the High Court or any Judge of the High Court from rescinding or modifying any interlocutory order passed by it or him in the course of a suit.

We have for reasons already given exempted the High Court from the operation of Sections 26, 27, 28, 29, and 34.

Lastly, we have empowered the Governor-General in Council to invest the chief Executive Officer of any part of British India under the immediate administration of the Government of India, with the powers vested by the Code in a Local Government.

We recommend that this Report and the Bill as amended be published in the Official Gazette.

Report of the Cultivation of Cinchonæ at Darjeeling during the Month of March 1865.

From T. ANDERSON, ESQ., M. D., Superintendent, Botanical Gardens, and in charge of Cinchonæ Cultivation in Bengal, to S. C. BAYLEY, ESQ., Junior Secretary to the Government of Bengal,—(No. 89, dated the 10th April 1865.)

I HAVE the honor to transmit herewith the Report of the Cinchonæ Cultivation at Darjeeling for the month of March 1865.

Report for the Month of March 1865.

Now that the Cinchona Plants are nearly all in the open air the progress of the cultivation is much more dependant on the nature of the weather than when the plants were growing in Conservatories, where the external cold could be counteracted by flues containing heated air, and where the moisture in the atmosphere could be increased or diminished according to the requirements of the plants.

In the open air the plants are in a much more natural condition than in Conservatories, but this alteration in the cultivation requires me to record generally the meteorological conditions of the month, in order to shew how the growth made during the month, and the operations of making cuttings, planting out, &c., and other works performed, have been affected by the weather.

The drawing up of rules for the guidance of those growing Cinchona and the deciding of the very important questions of which is the best season for making cuttings, of forming permanent plantations for bark, and above all the time when bark can be most easily removed from the trees and dried will be influenced by the results of carefully made meteorological observations. The time selected for the latter operation must be that of least growth, and this period will be most favorable should it coincide with the driest and sunniest season of the year.

Meteorological records are kept in the open air plantation, but for want of time these have been fully kept only at one plantation.

During March the weather has been extremely dry, the sky has been clear and cloudless, and though the sun has been very powerful, raising the thermometer to a mean maximum of nearly 80°, at the lowest plantation, but from the great radiation occurring during the still cloudless nights, the mean mininum temperature has been very low. The natural dryness has also been much increased by the extensive fires that have been raging all round; these have been caused by villagers burning the jungle for cultivation during the approaching rainy season.

At the fourth plantation the mean maximum during the month was 74°·68, the mean minimum 53°·55, mean temperature 64°·11.

At the fifth and lowest plantation the mean maximum temperature has been 78°·89, the mean minimum 53°·8, and the monthly mean temperature 66°·34.

These are not conditions favoring the growth of any plants, and certainly not of Cinchona, which require abundant moisture in the air and an equable temperature.

Though the growth has been small, still there is a marked increase on that of February, and the plants are in perfect health and have not suffered in the least degree from the dryness of the air.

Four hundred and twenty plants of *Cinchona Officinalis* have been planted out in the bark yielding plantation, No. 3, 3,715 feet above the sea. Only 7,214 cuttings have been made during the month.

The nursery for the distribution of Cinchona was commenced during the month. Due notice will be given before any sale of Cinchonæ takes place. I expect to be able to distribute at least 1,000 plants on the 1st July. The plan I propose to adopt will be submitted for the approval of the Lieutenant-Governor as soon as I can form an estimate of the number of plants I can dispose of during the year.

During the month 420 *C. Officinalis* have been planted out permanently at plantation No. 3 and are doing well.

The condition of the stock plants of *C. Officinalis* in the open air has changed but little, as the atmosphere is extremely dry in consequence of the rapid increase of temperature, and the reckless destruction of all the vegetation around us by the Natives who are clearing the land at present for their crops, and for the last fortnight all the slopes have been in a continued blaze all around the spur on which the Cinchonæ cultivation is carried on just now.

During the month 7,214 cuttings have been made. An unusually small number of these are *C. Officinalis*, as the plants were partially checked by their removal from the frames into the open air, and because it was considered necessary that these stock plants should be allowed to make young and strong wood again before cutting them down for propagation.

The permanent planting out of the *C. Pahudiana* has been deferred on account of the parching dry weather we have had until now. The condition of the plants must be considered excellent, as although growth has been slow they have improved in appearance, and their roots have got well distributed in the ground, so that a luxuriant growth will no doubt commence as soon as the atmosphere becomes moister than it is at present.

The plants at Lebong last year were not so forward on the 1st of May as they are now at Rungbee.

The operations of the last month consisted in making the abovementioned cuttings, planting out of *C. Officinalis*, preparing beds for the stock plants of *C. Succirubra*, and cleaning of a site for *C. Pahudiana*, and the construction of artificial water-courses for the watering of the beds containing the stock plants which has enabled us to prevent the plants suffering, although we could not accelerate their growth as the evaporation was most rapid and the country around us is so excessively dry, and this rapid evaporation naturally causes a reduction in the temperature of the air immediately around the plants.

LEGISLATIVE DEPARTMENT.

THE following Act of the Lieutenant-Governor of Bengal in Council received the assent of His Honor on the 11th April 1865, and having been assented to by His Excellency the Governor General on the 15th idem, is hereby promulgated for general information:—

ACT No. VI OF 1865.

An Act to provide for the regulation and enforcement of Contracts for Labor at places to which, by virtue of such Contracts, the Laborer is to be conveyed at the expense of the Employer.

Preamble.

WHEREAS it is expedient to provide for the due protection of native Laborers who have been or shall hereafter be conveyed at the expense of their Employers under the provisions of Act III of 1863, passed by the Lieutenant-Governor of Bengal in Council, *(An Act to regulate the transport of Native Laborers to the Districts of Assam, Cachar, and Sylhet)*, or of any other Law, to Districts other than the Districts to which they belong; and for the due enforcement of the Contracts entered into by such Laborers with the persons whom they shall have engaged to serve for hire; It is enacted as follows:—

Interpretation. "Laborer."

I. Throughout this Act the word "Laborer" means a Laborer who has heretofore entered or shall hereafter, under the provisions of Act III of 1863 or of any other Law, enter into a contract by which he has been or shall be conveyed to the place of labor at the expense of the Employer contracting.

"Protector."

The term "Protector" includes any Officer appointed by the Lieutenant-Governor of Bengal to perform all or any of the duties of a Protector under this Act.

Number and Gender.

Words used in the masculine gender include the feminine, and the singular number includes the plural.

Recruiter, bringing Laborer to engage in a District to which he does not belong, may be fined.

II. If, upon any examination made in accordance with Section XI of the said Act III of 1863 or any other Law, it shall appear that any Laborer, belonging to any District in the Provinces under the control of the Lieutenant-Governor of Bengal, brought before the Magistrate by a recruiter, or otherwise, does not belong to the District in which the examination has been conducted, and has not resided there a reasonable time for purposes of his own, or come there of his own accord to seek for employment, but has been brought thither from another District in the said Provinces with the view of prevailing upon him to enter into an engagement there, it shall be lawful for the Magistrate to fine the recruiter such sum as in the judgment of the Magistrate may be sufficient to enable the Laborer to return to the District to which he belongs, and to apply such fine to the re-conveyance of such Laborer to such District.

Previous Section not to apply to recruiters bringing Laborers from a District not within Bengal.

III. The provisions of the preceding Section shall not apply to any Laborer who shall come from any Province or District not under the control of the Lieutenant-Governor of Bengal, for the purpose of entering into an engagement in a District under such control. Any Laborer recruited in any such Province or District as last aforesaid, shall be taken by the recruiter, for the purpose of registry under Section II of the said Act, before a Magistrate of that District, subject to the control of the Lieutenant-Governor of Bengal, into which such Laborer shall first come after his engagement.

V. If, during the currency of any contract as aforesaid, the estate on which the Laborer shall have engaged to work shall be sold or transferred, by the party contracting with such Laborer, to some other person, or if some other person shall become proprietor thereof by reason of the death of such party, the contract shall, by such event, become null and void as regards the party originally contracting, and shall be valid to all intents in law as between the new proprietor and the Laborer, and shall enure in the same manner as if such new proprietor had been named in the contract as the party contracting; and so in the case of any subsequent transmission of interest by sale, transfer, or death.

Contract may be transferred by mutual consent.

VI. Every such contract as aforesaid may, by mutual agreement of the parties thereto, be transferred by the Protector of Laborers to any other Laborer or Employer; but in such case the Protector shall endorse such transfer on the contract, and shall also register it in his own Office.

Penalty for breach of last Section.

VIII. If, on any estate in which Laborers are employed, it shall at any time be found that there is not such hospital accommodation as aforesaid, or that that there is not provided for the use of such Laborers medicine of such quality and descriptions and according to such scale as aforesaid, the chief person in charge of such estate shall be liable to a fine not exceeding five hundred Rupees. And if there shall be three hundred or more Laborers employed on such estate, and it shall be found that there is no such Medical Officer as aforesaid, such chief person as aforesaid shall be liable to a fine not exceeding five hundred Rupees. The continued omission to observe the provisions of the last preceding Section shall be fineable under this Section as a distinct offence, and so on until the omission is duly supplied.

Provided, nevertheless, that the period of imprisonment shall in no case be prolonged by reason of no person being present on the part of the Employer to take charge of the Laborer at the expiry of the sentence, but the prisoner shall, in that case, be sent to the Employer's estate, and the expense of such conveyance shall be levied from the Employer in the manner provided for the realisation of fines under this Act.

LEGISLATIVE.

The following Report of a Select Committee, together with the Bill as settled by them, was presented to the Council of the Governor-General of India for the purpose of making Laws and Regulations, on the 13th April 1865:—

REPORT.

We, the undersigned, the Members of the Select Committee of the Council of the Governor-General of India for the purpose of making Laws and Regulations, to whom the Bill for consolidating and amending the Laws relating to the Procedure of the Courts of Civil Judicature in British India, together with the communications noted in the annexed list, was referred, have the honour to report as follows:—

We have carefully revised the Bill, and have adopted a large number of the suggestions contained in the communications above mentioned.

Before entering into the details of our revision we may premise that the alterations which we have made are to a great extent verbal, and that, with very few exceptions, they do not affect the general or fundamental principles of the Bill as introduced.

The most important alterations involving questions of principle are in the Sections relating to the specific performance of contracts, and in the part of the Code relating to Reviews of Judgments.

We have provided that specific performance shall not be decreed of any contract, the complete performance of which is necessarily extended over a longer period than five years. When any such contract shall have been entered into before the passing of the Act, we propose that specific performance shall not be decreed for more than five years from the date of the decree.

We have altered Sections 131, 132, 133, 134 and 135*(a)*, and confined their operation to suits brought to enforce the specific performance of registered contracts. For the procedure to enforce the *ex parte* order given under Section 133, we have provided that, on proof of service of the order, the Court shall receive the plaintiff's evidence, and, subject to certain conditions, pass a decree for specific performance. The conditions prescribed are these:—that the consideration is adequate; that the contract is reasonably certain; that the defendant is able to perform it, and that the performance will not impose extreme or immoderate hardship upon him. We have thus, we trust, met the objections of those who fear that the power of enforcing specific performance of contracts by the attachment of the property and the imprisonment of the party guilty of the breach of contract, may be used as an instrument of oppression. We have enabled the Court to decree damages in the event of the contract not being specifically performed, and provided for the execution of the decree.

The power given to the Judges of the subordinate Courts of reviewing, of their own authority, orders passed not only by themselves but by their predecessors, or by Judges for whom they are merely officiating, has, we understand, led to considerable abuse, and the Committee are strongly of opinion that the opportunity for this abuse should be taken away.

Under the Code as it now stands, many orders passed in execution of a decree are not open to appeal. It has been suggested that in such cases

(a) The numbers in this Report refer to those of the Sections of the Bill as introduced and published in the *Gazette of India* for 29th April 1864.

either an appeal or a review of judgment should be allowed.

We have thought it better to adopt the latter alternative, subject to the proviso, which we propose should extend generally to reviews, that, when the review is granted by a Court subordinate to a District Court, it shall be with the previous sanction of such Court, and that, when granted by a District Court, it shall be with the previous sanction of the High Court.

We have armed the Civil Courts with power to punish witnesses for failing to attend when summoned, instead of leaving the cases of persons so offending to be dealt with by the Criminal Courts. The necessity for this provision in order to the due administration of justice has been strongly pressed by many Judges, some of them of long standing and of considerable experience.

We have introduced several changes in the Chapter relating to the High Courts, and exempted those Courts from the operation of some Sections, which, however well adapted to Courts in the Mofussil, have been found unnecessary and, in some instances, inconvenient in the High Courts with their superior judicial agency.

We will now specify some of the minor additions and alterations which we have thought necessary.

We have added definitions of 'Person,' 'Section,' 'Chapter,' 'Law,' 'Judgment,' 'Decree,' 'Immovable Property,' 'Movable Property,' 'Bond,' 'Document,' and 'Subordinate Court.'

We have inserted a clause analogous to Section 3 of the Bill as introduced, providing that the Sections to which the letters 'R. C.' are affixed, shall extend to Revenue Courts.

We have provided that every person shall be entitled to sue except persons expressly prohibited from suing by any law. Executors and administrators, trustees of express trusts, and next friends of lunatics and idiots may, on obtaining the permission of the Court, sue without joining with them the persons for whose benefit the suit is brought. Infants will sue by guardian or next friend, who will be admitted and may be removed by the Court, and who may be made liable for the costs of the suit. We have also provided that an infant defendant shall appear by guardian.

To Section 10 we have added explanations after the manner of the Indian Penal Code and the Indian Succession Act, 1865, as to the place in which a cause of action may be held to have arisen: as to the dwelling necessary to give jurisdiction: as to the place in which a Corporation or Company shall be deemed to carry on business; and as to the business contemplated in the Section. To Section 61 we have added an explanation of what shall be considered to constitute residence out of British India. We have also given explanations as to the adequacy of consideration and the certainty required for enforcing specific performance of a contract.

We have introduced Sections declaratory of the tribunal in which suits not for immovable property, shall be brought against the Secretary of State, the Government of India and the local Governments.

We have provided for the subscription and verification of the plaint in suits by Government or the Secretary of State.

We have extended Section 24 (as to declaratory suits) so as to enable the Court to make declarations of future rights, and to empower a trustee to obtain a declaration of the respective rights of the persons interested in a trust-estate. We have provided that no Court shall make any declaratory decree or order unless it could, if required, act upon it by giving consequential relief.

The extension of Railway communication has induced us to add to Section 73 a second exception to the rule that no party resident more than fifty miles from the Court shall be ordered to appear in person. We have provided that if Railway communication exist between the place where the party reside and the place where the Court is held, or within a convenient distance from such places, the Court shall have a discretion as to making such order. A similar addition has been made to Section 280.

On the issue of a Summons for final disposal, the parties will be required to produce their witnesses on the day fixed for hearing the suit; and we have provided a procedure where the Court cannot give judgment at the first hearing.

When the defendants are partners and the suit relates to a partnership transaction, service on one defendant for himself and the others will be sufficient.

When the defendant fails to comply with an order under Section 118 to give security for his appearance, we have provided by express words that the Court may commit him to Jail.

We have added a clause to Section 120, providing that the Court, if satisfied of the plaintiff's inability to furnish the specification and valuation required by that Section, may dispense therewith.

We have provided that an award of compensation for arrest or attachment on insufficient grounds, or for the needless issue of an injunction, shall be executed like a decree for money.

A Notice to produce documents when served on a party to a suit will, if the Court shall so order, have the force of a Summons.

We have altered Section 163, so as to enable the Court, when the defendant fails to appear, to dispense with strict proof of the service of the Summons; and we have provided that, if the Summons shall have been issued for the final disposal of the suit, the Court, if satisfied of the justice of the plaintiff's claim, may proceed to pass a decree in his favour *ex parte*. The written declaration

(mentioned in Section 173) in support of the cause shown for failure to appear will now be on stamp-paper where a stamp is required for petitions.

As a preliminary to setting aside a decree *ex parte* in a suit involving a claim to money, we have considered it right to require the amount with costs to be paid into Court.

We have provided that, in the case of any party failing to present a written statement called for under Section 183, the Court may pass a decree against him, or make such order in relation to the suit as it may deem proper.

In order to bring the Code into harmony with the Stamp Act (X of 1862, Section 15) we have made the penalty payable on the reception of unstamped or insufficiently stamped documents treble, instead of double, the amount of the stamp duty or additional stamp duty which it should have borne.

We have added a proviso to Section 217 that when the hearing of evidence shall have once begun, the hearing of the suit shall not be adjourned at the application of any of the parties, except from day to day, when all the witnesses cannot be examined on the same day. Great encouragement has been given to perjury and subornation of perjury, and other serious irregularities have arisen, in consequence of the facility hitherto enjoyed of obtaining adjournments, especially in the hearing of evidence.

We have provided a procedure where cases, in which a District Court shall have given an opinion under Section 245 on the law of the religion or of the established customs of the parties, shall come on appeal before such Court.

We have made provision in Section 266 for the Judge's temporary inability to take down evidence as required in that Section.

We have empowered the Court to appoint any Government Officer with the consent of his immediate superior to be a Commissioner to make a local investigation.

We have provided a procedure *ex parte* when the parties do not appear before the Commissioner.

As to costs, we have provided that, at the time of disposing of any application, the Court may award to either party the costs of such application, or reserve the consideration of such costs for any future stage of the proceedings. We have further empowered the Court to set-off costs payable to one party by another against a sum which the former shall admit to be due from him to the latter. We have also provided that the Court may give interest on costs at six per cent., and direct that costs, with or without interest, be made a charge on the subject-matter of the suit. In case of the plaintiff's bankruptcy or insolvency, we have provided that the Court may award the defendant's costs to be recovered out of the plaintiff's estate; and, where the plaintiff withdraws from the suit without permission, he will be liable for such costs as the Court shall award. We have given the Courts power, in rejecting a written statement and on re-admitting an appeal dismissed for default, to impose terms as to costs or otherwise.

We have by express words empowered the Courts to appoint the Assessors mentioned in Sections 298 and 299, and we have thought it inexpedient to require that the opinions of the Assessors shall always be given orally.

We have empowered the Court, with the consent of the parties, to put any of them or any other person on his oath or affirmation, and to decide the suit on the statement made under that sanction.

We have provided that, if the judgment in suits in which a regular appeal is not allowed be written in English, it shall not be necessary to translate it, unless any of the parties require a translation. In like manner the judgment of the Appellate Court need not be translated unless any party shall so require.

The judgment of a Court of Small Causes will not be required to give the reasons for the decision.

We have provided for the execution and, if necessary, the alteration of the conveyance or endorsement tendered under Section 327. We have also provided for the case of the Judge agreeing to a conveyance going beyond the terms of the decree, or refusing to agree to a conveyance in conformity with those terms.

A warrant for arrest of the defendant will direct the serving officer to bring him before the Court.

In Sections 369 and 400 we have authorized the immediate sale of perishable commodities.

Where there is a mortgage or lien on the attached property, we have provided that the attachment shall continue subject to the claim of the mortgagee or person entitled to the lien.

If the decree-holder purchase at an execution sale, we have provided that the amount of his decree may be taken in payment, in whole or in part, as the case may be.

As regards the enforcement of registered Bonds, we have provided that the obligee of a bond payable by instalments may sue before all the instalments shall have become due. We have also provided that the representative of a deceased obligor may plead that he never received any assets, or that they have been paid away, or that they are insufficient.

In Section 512 we have added to the grounds of setting aside an award—either party having fraudulently concealed any matter which he ought to have disclosed, or having wilfully misled or deceived the arbitrators or umpire. The Section

as it stood provided for setting aside an award on the ground of misconduct, only when a charge of such misconduct was established against the arbitrators or umpire. As observed by the Madras Government, this renders such charges more frequent than they would otherwise be, and the probability of being exposed to them makes respectable men unwilling to arbitrate.

We have given a regular appeal in respect of costs alone, provided that it shall appear upon the face of the decree or order that the Court below proceeded upon a mistake or misapprehension.

We propose that on appeal the Courts should be required, of their own motion, to take cognizance of defences founded on lapse of time, breach of the Stamp laws or want of jurisdiction.

A respondent taking objection to the original decree from which he may have preferred no cross-appeal, will have to give seven days' notice in writing of such objection.

We have added to the grounds of special appeal, failure by a subordinate Court to determine an issue of law or usage having the force of law, and error in the opinion given by the District Court on a question of religious law or established usage or custom.

The Advocate's certificate endorsed on the application for a special appeal or for a review of judgment, will be required to specify by their numbers which of the grounds he considers well founded and sufficient.

We have given the High Court power to call for the record of any case decided by a Court of Small Causes, or, on appeal, by any subordinate Court, in which no appeal shall lie to the High Court, if such Small Cause Court, or such subordinate Court, on hearing the appeal, shall appear to have exercised a jurisdiction not vested in it by law.

We have omitted the Section empowering the Courts to return the stamp duty paid on an application for review.

In the Chapter on High Courts, we have omitted the provision contained in Section 629 as to suits against the representative of a deceased person on a cause of action which accrued against the deceased in his life-time. We have also omitted Section 632 as unnecessary.

In a Division Court, if the Judges shall be equally divided, the opinion of the Senior Judge will prevail.

We have extended the power of reference given by Section 640, so as to enable the matter to be investigated by the Registrar or other proper Officer of the High Court, and we have declared that any act not of a judicial nature which the Code requires to be done by a Judge, may be done by the Registrar, or such other Officer as the Court may direct.

We have declared that in suits coming before the High Courts in the exercise of their ordinary original jurisdiction, Attornies may obtain and serve summonses.

We have provided that nothing in the eighth Section shall debar the High Court or any Judge of the High Court from rescinding or modifying any interlocutory order passed by it or him in the course of a suit.

We have for reasons already given exempted the High Court from the operation of Sections 26, 27, 28, 29, and 34.

Lastly, we have empowered the Governor-General in Council to invest the chief Executive Officer of any part of British India under the immediate administration of the Government of India, with the powers vested by the Code in a Local Government.

We recommend that this Report and the Bill as amended be published in the Official Gazette.

Service of summons on witness resident in another jurisdiction.

232. If the person required to attend be resident within the jurisdiction of any Court other than that in which the suit is pending, the summons shall be transmitted by the Court in which the suit is pending to any Court other than a High Court having jurisdiction at the place where the witness resides, by which it can be most conveniently served; and the Court to which the summons is sent shall, upon receipt thereof, deliver the same to the proper Officer of such Court, to be served in the manner above directed. Upon the return of the summons by the serving Officer, it shall be sent to the Court from which it originally issued. (S. C. C. & R. C.)

233. If the summons for the attendance of a person either to give evidence or to produce a document, cannot be served in either of the ways hereinbefore specified, the Court, on being certified thereof by the return of the serving Officer, and upon being satisfied that the evidence of such person or the production of the document is material, and that he is absconding or keeping out of the way for the purpose of avoiding the service of the summons, may cause a proclamation requiring his attendance to give evidence, or produce the document, at a time and place to be named therein, to be affixed on some conspicuous place of the house in which he is dwelling; and if he shall not attend at the time and place named in such proclamation, the Court may, at the instance of the party on whose application the summons was issued, make an order for the attachment of the movable property of the person whose attendance is required to such amount as the Court shall deem reasonable, not being in excess of the amount of the costs of attachment and of any fine to which he may be liable under the provisions of Section 235. (S. C. C. & R. C.)

If witness appears attachment may be withdrawn.

234. If, on the attachment of his property, such person shall appear and satisfy the Court that he did not abscond or keep out of the way to avoid service of the summons, and that he had not notice of the proclamation in time to attend at the time and place named therein, the Court shall direct that the property be released from attachment, and shall make such order in regard to the costs of the attachment as it shall deem fit. (S. C. C. & R. C.)

Report of the Proceedings of the Agricultural Show held at Dacca.

From C. T. BUCKLAND, ESQ., Commissioner of the Dacca Division, to the Secretary to the Government of Bengal,—(No. 181T, dated the 24th December 1864.)

I HAVE the honor to submit, for the information of the Lieutenant-Governor of Bengal, a Report of the proceedings connected with the Agricultural Exhibition of the Dacca Division.

2. On the receipt of the orders of Government establishing Divisional Agricultural Exhibitions, and placing a sum of Rupees 3,000 at the disposal of each Commissioner for the purposes of the Exhibition, the first step which I took was to endeavor to ascertain the feeling of the non-official and Native community of Dacca on the subject, as the Exhibitions are held for their benefit, whilst to the officials they only gave additional trouble and labour. A Meeting was held by Mr. Wise at his house, at which he was so good as to explain the objects and intentions of Government to the European and Native gentlemen there assembled; and the result of this Meeting was eminently satisfactory, inasmuch as more than Rupees 5,000 were at once subscribed at the Meeting, Mr. Wise giving Rupees 1,000, and Khajeh Abdool Gunny and his son, Khajeh Ashonoollah, subscribing Rupees 1,000 each. At a later date Baboo Kalli Narrain Roy Chowdry and Baboo Juggernauth Roy Chowdry each subscribed Rupees 1,000.

3. I was at Mymensing when the Meeting at Mr. Wise's house took place, and the news of the result of the Meeting reached me at Mymensing. The promotion of the Exhibition was at once warmly taken up by Mr. Henderson, the Collector of Mymensing, and under his auspices the Zemindars of that District and the English residents contributed a subscription of more than Rupees 6,000.

4. The Collectors of Backergunge, Furreedpore, and Sylhet, and the Deputy Commissioner of Cachar, were also addressed, and it is due to the exertions of Mr. Levien, the Collector of Backergunge, that a sum of nearly Rupees 3,000 was subscribed in his District, notwithstanding the total indifference, not to say recusance, of some of the most wealthy but absentee Zemindars, such as Rajah Sutchurn Ghosal and Baboo Gopaul Loll Tagore. So also at Furreedpore the Collector had to struggle against the indifference of a powerful absentee landlord such as Baboo Gurudoss Roy; whilst at Sylhet, where there are few, if any, Zemindars of wealth or influence, the fortunate presence of Major Raban, Deputy Inspector-General of Police, at the first Meeting held by the Collector, luckily gave some life and impetus to the cause. At Cachar the conflicting intersts of the local Méla and the distance from Dacca prevented the community from coming forward in their proper strength, but it will be seen from the Prize Lists that Captain Stewart, the Deputy Commissioner.

took such active measures that Cachar was well represented at the Exhibition in cattle, poultry, and produce.

5. On my return to Dacca a Meeting was held and a Central Committee of Management was appointed with the necessary Departmental Committees of which the detail is given in the margin. The Prize Lists were also drawn out chiefly on the model of those issued by the Oude Committee, with this important modification that, with the view of encouraging numerous contributions from each District, we offered prizes for the best things of each District, as well as Divisional prizes for the best things out of all the Districts. The total value of the prizes offered was Rupees 11,733.

Messrs. Dunne and Lyall, *Secretaries.*

6. I should not omit to state that Messrs. Dunne and Lyall were appointed Secretaries to the Committee of Management; Mr. Dunne as representing the non-official and landed community, and Mr. Lyall, the covenanted Assistant of the District, as representing the official element in a mitigated form, but with much personal energy and good will. It would be difficult sufficiently to acknowledge the services of these gentlemen, as on them devolved the whole labour of the preparations for the Exhibition.

7. At Mr. Dunne's suggestion a site was selected of unusually good natural capability. In the centre there is a tank nearly 200 yards long and 100 yards broad, surrounded, on three sides, by fine cassuarine trees. On the banks of this tank there is a fine open space which we enclosed with a high mat fence 325 yards in length by 240 yards in breadth. Within this enclosure the several sheds for the reception of animals, &c., were erected. On the North side were the sheds for horses, ponies, sheep, and goats; on the East the cattle sheds; on the South the sheds for implements, produce and manufactures; and on the West the sheds for poultry. A small enclosure was also reserved on the South side for a large tent and canopy and within this enclosure only Season Ticket-holders were admitted.

8. The sheds were constructed of simple bamboo work and roofed with light mats, not covered with any thatch as there was no fear of rain. Each shed was 200 feet long by 20 feet broad, except the cattle sheds, which were eight in number and were each 100 feet long by 20 feet broad. The internal arrangements were adapted to the articles and animals to be placed in them, and in the poultry sheds we endeavored, as far as possible, to follow the plan of the pens used at the Calcutta Exhibition as explained in the printed Reports.

9. The Exhibition was opened to the Public on Tuesday, 6th December, which was found to be more convenient than Monday, the 5th December, which had been originally named. I considered it desirable to open the Exhibition with some ceremony, and I trust that the Lieutenant-Governor will not think that this was wrong. A raised dais was arranged under a large canopy, and on the dais Mrs. Abercrombie, as the Lady entitled to precedence, occupied the principal seat, supported and surrounded by a large assembly of European ladies and gentlemen, and by the Chief Members of the Native community. After a brief report of the proceedings had been read to the assembly by me, Mrs. Abercrombie declared the Exhibition to be open in the Queen's name, and the Guard from the 5th Regiment L. N. I., which had attended by the orders of Lieutenant-Colonel Fisher, presented arms and the Band played God save the Queen. Our best thanks are due to Mrs. Abercrombie for the kind manner in which she undertook the duty.

10. The Exhibition remained open on the 7th, 8th, 9th, 10th, and 12th. The receipts taken at the doors were very considerable, but I have not received a separate account for each day, the total amount being Rupees 1,774. On the 12th December, when admission was gratis, the people admitted probably numbered nearly 10,000, as a great many looked in at the Exhibition on their return from the Races, which took place in the morning; and in the afternoon I myself saw the crowd, of whom it is satisfactory to state that a number were women and children.

11. As at the opening of the Exhibition it had not been possible to give full place and precedence to the Natives according to their own views, I arranged to hold a sort of Durbar on Thursday, the 8th, at which all the Native gentlemen were requested to attend. The only Native of recognized rank in the Division was the brother of the Shoosung Rajah from Mymensing, who contributed very liberally and exhibited many articles and animals. There were also Baboo Kalli Narrain Roy Chowdry and Baboo Mitterjeet Sing amongst the Hindoos, whilst the chiefs of the Mahomedan community were Khajeh Abdool Gunny and his son, Kahjeh Ashonoollah, and Syud Tujumul Ali, of Shaistabad, and Nazimudin Chowdree. I addressed a few words to the Native gentlemen, of whom about 150 were assembled, after which Syed Abdool Mujeed Khan, Deputy Magistrate, and Baboo Ramkumar Bose, Deputy Magistrate, and Baboo Kashee Kanth Mookerjee, Inspector of Schools, addressed the Meeting, the first in Oordoo, and the last in Bengalee, explaining, with much clearness and eloquence, the objects and advantages of Agricultural Exhibitions. These addresses, which were very well received, will, I have reason to believe, be printed and circulated to the community.

12. On Saturday, the 10th, the Prizes were distributed, and a sum of nearly Rupees 7,000 was delivered by me in cash chiefly to the actual winners of Prizes, but in their absence to the Collectors representing their Districts. The actual cash payment seemed to afford much satisfaction, but the Prize Tickets were also very generally carried off in triumph.

13. On the evening of Saturday the tank, in the centre of the enclosure, was illuminated with thousands of small lamps along its margin and with numerous colored lanterns suspended from the trees. This was followed by a display of fireworks on the adjacent plain, and, although these things are foreign to the purpose of an Exhibition, it is not to be denied that they gave much general

pleasure and satisfaction, and as our subscriptions were so ample we could well afford them.

14. The Exhibition remained open gratis on Monday, the 12th. On Tuesday, the 13th, permission was given to remove all the animals and articles, and by the evening of that day, under the effective management of the various Members of the Committees, nearly every thing had been removed. After the 14th there remained nothing but the animals and articles intended for sale, and on the 15th these were all sold at the Collector's Office, and very fair prices were realized for some of the things.

15. The general financial result of the Exhibition may be stated in round numbers as follows, but as we have not yet been able to finally close our Accounts, either of Receipts or Disbursements, I am only able to give the approximate results :—

16. We expect to recover about one-fourth of the cost of the sheds by the sale of the materials, but as it would be injudicious to sacrifice them by a forced sale the account is not yet settled. The only result which I can now positively announce is one which I ventured to predict as soon as I heard of the Dacca subscriptions, *viz.* that we would hold the Exhibition without its costing Government any thing; and as we only drew Rupees 1,000 of the Government grant for preliminary expenses before our subscriptions were paid up, I shall order that sum to be refunded to Government as soon as our Receipts and Disbursements are wound up.

17. The Judges who awarded the prizes in each Department have sent in their separate Reports which I have now the honor to submit, and trust that they will meet with the Lieutenant-Governor's approval. The Judges had a rather arduous task in awarding the prizes, and I should not omit to acknowledge the labours of the Departmental and District Committees, who had also a very difficult work in arranging and assorting the animals and articles in their proper places to enable the Judges to enter upon their duties.

18. I beg to offer my best thanks to the Members of the Divisional and District Committees who gave their services so freely and cheerfully to the purposes of the Exhibition, although they had, at the same time, the onerous duties of their own Offices to attend to, and at Dacca we were under special obligation to Lieutenant-Colonel Fisher and the Officers of the 5th L. N. I., who co-operated with us in every way, and were always ready to contribute the services of their Band for the entertainment of the visitors to the Exhibition.

19. By the permission of the Commissioner of Police for Calcutta I obtained the services of five English Serjeants of the Calcutta Police Force, and my reason for making special mention of this is that the Officers of other Divisions may obtain the services of the same men for their Exhibitions. For although the cost of bringing them such a distance was considerable, especially in boat hire, they were exceedingly useful both as Guards and as Superintendents of the different Departments, and as money-takers, and I believe that it is chiefly owing to their presence that we escaped without any loss by theft or pilfering, as the Natives stood in great awe of them. The Local Police under their European Inspector were certainly very useful, and I beg to acknowledge their services, but they would scarcely have been sufficient by themselves.

20. It is almost superfluous for me to add any thing to the Reports of the Judges. The cattle were good, and the poultry so very superior that most people were surprized at them. Some buffaloes were sent to the Show, and two were in the cattle sheds during the Exhibition, but they were exceedingly excitable and dangerous. Two other buffaloes were brought within the enclosure, but at once broke lose and plunged into the tank. When they had cooled themselves, and evening came on, they emerged from the tank and began rushing about in a very dangerous manner, and had it not been for the presence of the Calcutta Serjeant who was looking after the cattle they would probably have done mischief. They were at last got out of the enclosure, and I beg strongly to recommend that, as suggested by the Judges, buffaloes should not in future be included in the Prize Lists or admitted for exhibition.

21. In the Department of produce and raw material, I believe that the Judges are fully justified in declaring the specimens exhibited to be very superior. Special notice is made of a new kind of fibre similar to jute, but, coming from a larger plant which grows wild in the jungles of Bhowal which belong to Baboo Kalli Narrain Roy, and in other parts of the District, it may become an article of much profit and importance. The Medal of the Calcutta Agri-Horticultural Society was awarded to Mr. Dunne for the specimen of Cachar Tea exhibited by him.

22. We were much disappointed in the Department of Implements and Machinery for which we had offered above Rupees 3,000 in prizes; but the Calcutta Firms who might have exhibited them had already made engagements to send them to the Lucknow and other Exhibitions. Messrs. T. E. Thomson sent down a small collection of implements and hardware for sale, and for some of these articles prizes were given. A great deal of interest was taken by the Natives in this collection, and if Messrs. T. E. Thomson had sent down an intelligent representative of their Firm with their goods he would doubtless have sold

more of them and would probably have obtained further orders for them.

23. I beg, however, to make special mention of the brick-moulding and tile-making machinery invented and exhibited by Mr. S. A. Stewart, C. E., the Executive Engineer of the Dacca Division. These machines for their efficiency and simplicity of construction (as they can be made by any Native workmen) are particularly deserving of the attention and official examination of the Officers of the Public Works Department, to whom I would venture to recommend that a copy of these remarks, with the remarks of the Judges on these machines, should be sent.

24. It only remains for me to observe that, as far as it is possible to ascertain Native opinion, much satisfaction was afforded to all who visited the Exhibition. Much anxiety was expressed in enquiries as to when and where the next Exhibition would take place, and there was a rumour that Mymensing and Dacca were prepared to enter into competition and to increase their subscriptions in order to secure to themselves the honor of the Divisional Exhibition next year.

25. My own opinion is that it would be best to have District Exhibitions next year with a view to the gradual instruction of the Districts on the subject, which of course is at present almost utterly unknown to the great majority of the people. I would recommend that there should be three Exhibitions next year, one at Mymensing for that District and Dacca, one at Backergunge for that District and Furreedpore, and one at Sylhet for that District and Cachar. It would of course be optional to all the Districts of the Division to send to each Exhibition as well as to their own, and the time for holding each Exhibition might be arranged accordingly. But the distance between some of the Districts and the Head-Quarters at Dacca is so enormous that it is almost impossible to induce the people to send things and still less to come themselves in any numbers, and I therefore think that the Exhibition ought in a manner to go to them. Perhaps the Lieutenant-Governor will think it right to leave this arrangement to the local Officers, but I merely state my own opinion for His Honor's information.

26. I beg to add that Mr. Crawford, the Honorary Secretary of the Calcutta Exhibition, was present at the Dacca Exhibition, but, as I was not informed if he attended officially, I have only to observe that he made himself very useful and his presence was very welcome.

27. A copy of the Prize Lists is herewith submitted. As usual at all Exhibitions there was some grumbling amongst disappointed exhibitors, but with a view to meet with any just complaints, I had the representations of as many of the grumblers as could be found carefully considered by a Special Committee of Native gentlemen, and to any thing which had any sort of claim or merit a special or extra prize was given; but I declined to award to a pony from Mymensing a prize which was claimed for it on account of its beautiful eyes.

REPORT OF THE JUDGES IN DEPARTMENT I.

LIVE STOCK.

Class I.—Cattle.

CONSIDERING the nature of the Districts in this Division the number of the cattle exhibited (84) was very good as regards bulls and cows. There were but few pairs of draught bullocks exhibited, but it was not to be expected that many should be shewn, as there is but little use for them in Eastern Bengal.

The bulls shewn were very good on the whole, but the greater part of them were of the large Up-country breed, a more imposing looking animal than one of the pure Bengallee breed, but, as is well known, not so useful in these Districts. The first prize for the Division was carried off by Mr. Wise's five years' old bull, who gained three prizes at the Calcutta Show last year. The second was awarded a bull belonging to Rajah Rajkishto Sing of Mymensing, and the third to a fine three years' old bull of Khajeh Abdool Gunny of Dacca. These bulls were all of the Up-country breed. A very fine animal was exhibited by Baboo Mitterjeet Sing, but it was debarred from competition by age. A very handsome bull of the pure Bengallee breed was exhibited by Baboo Kalli Narrain Roy Chowdry and obtained a prize. This was the only really fine animal of the breed, and we would recommend that in future a separate prize should be given for this class of animal, as it is the best adapted to the ordinary requirements of the people of this Division.

The cows were very good. Some beautiful animals were exhibited from the Dacca and Mymensing Districts. Khajeh Abdool Gunny took the first prize with a half English half country cow. The second prize fell to Mr. Wise for a very handsome white cow, and the third to Mr. Henderson of Mymensing for a beautiful animal somewhat smaller than the above two. With a little attention to breeding, and care in the food and housing, there is little improvement to be desired in this class of animal which is well suited to these Districts.

The first Prize for draught bullocks was given to an exceedingly handsome black pair from Cachar; Khajeh Abdool Gunny took the second prize with a good white pair much superior to the common run of animals, and Mr. Hampton of Mymensing the third prize. But seven out of eighteen prizes for the several Districts were awarded owing to want of competition, and we think that the Prize List for draught cattle, therefore, might be revised for any future Agricultural Show.

The cattle occupied eight sheds and were classified according to Districts, for convenience sake in awarding the prizes, with the exception of the bulls, which were in a shed by themselves. One shed was set apart for buffaloes. Seven were brought up for exhibition, but only two were admitted, as the others were savage, and would, to a certainty, have committed damage. As these animals are kept almost entirely for their dairy produce, we think it an open question whether, in future Shows, it would not be sufficient merely to exhibit the produce. Prizes were, however,

awarded, though none of the animals were worthy of special mention.

Class II.—Horses and Ponies.

Considering that these animals are chiefly, if not entirely, used by the wealthy in the large Towns of the Division the Show was good. No prize was awarded to a stallion, as none came up to the terms. Some difficulty was felt in awarding prize to a hackney among competing animals of very varied qualities and different breeds, and we, therefore, gave two extra prizes for Arabs. We would recommend that in future the "Hackney Prize" should be given on the terms used in the Rajshahye Division to the horse most useful for general purposes above fourteen hands. Only four brood mares were shewn. Of these two shewn by Messrs. Dunne and Thoms of Dacca are worthy of special notice, as their progeny in the shed proved most satisfactorily that the climate here is not an insuperable bar to breeding good horses as is usually supposed.

The ponies were divided into two classes, Country and Munipoorie. The former was not as well represented as it might have been, but no doubt this will be remedied in future Shows. One very good pony bred in the Mymensing District was exhibited by Mr. McSweeny of Mymensing and gained the first prize for the Division. None were exhibited from the Backergunge, Sylhet, and Furreedpore Districts.

The Munipoorie ponies were good. The first prize was taken by Mr. Henderson of Mymensing for a very handsome white animal much superior to all others of its class.

The sheds and stabling for the cattle and horses were very good, and the arrangements for feeding, &c., were complete. No accidents of any sort occurred in this Department.

Class III.—Sheep and Goats.

The Show of sheep was fair, but as these are only bred in a few places in the Division they were not numerous. They were mostly of the Bengalee breed, though some were Patna. None were worthy of special notice.

Some good goats were shewn both of the Up-country and Bengallee short beard breed. A handsome pair of long boards came from Cachar and obtained a prize. A very fine pair of Up-country goats were shewn from Sylhet, and a fine buck goat from Dacca.

Class IV.—Poultry.

The Show of poultry was very fine. Several of the pens were exceedingly good. Mymensing carried off the first Prize for the Division, Dacca the second, and Backergunge the third. The capons were also very good. The first was awarded to an uncommonly fine pen exhibited by Mr. Thoms of Dacca, and the second to one shewn by the Principal Sudder Ameen of Mymensing. There was a fair Show of Chittagong fowls, but only one complete pen of bantams. We gave extra Prizes to two pens of game fowls, one a fine one exhibited by Mr. C. A. Fisher of Dacca, the other by Mr. Dunne of Dacca. An extra Prize was also given to the latter gentleman for Abyssinian Fowls. We would recommend the attention of exhibitors being drawn to the necessity of cooping up poultry together at least a fortnight before the Exhibition, otherwise they ruin each others beauty when put in the same pen in the yard. One fine cock from Backergunge had all his feathers plucked out by one of his own hens and was completely spoilt, and many of the capons had to be cooped up separately as they fought when together.

APPENDIX to the REPORT of the JUDGES in DEPARTMENT I.

Live Stock.

Class IV.—Continued.

The show of turkeys was not a large one, but the birds shewn were good. Mr. Hampton got the Prize for the best hen, Mr. Dunne of Dacca got that for the best cock. An extra Prize was also awarded to Imdad Ali of Dacca. No Guinea fowls were shewn except from Sylhet, as it is exceedingly difficult to rear them in this part of Bengal. The birds shewn obtained two Prizes. There was a large shew of geese, and some of the birds were fine ones. Mr. Hampton of Mymensing took a Prize with a good pen, and A. Thoms, Esq., of Dacca that for the best gander with a large handsome bird.

The ducks exhibited were not numerous, nor were there any particularly fine birds. Mr. Hampton of Mymensing had some well feathered ones, and a very pretty pen was shewn from Cachar.

There was a very small show of rabbits. Mr. Kerr of Mymensing got the first Prize and Miss Brennand of Dacca the second Prize. None were worthy of special notice.

The pigeons were well represented. Mr. Monnier got the Prize for the best cage, Gour Chunder Roy for the second, and Syud Abdool Mujeed for the third. Mr. Monnier also showed the best tumblers, but was hard run by Khajeh Ashanoollah with a pair of very good birds. Mr. David of Dacca showed some very fine fantails. Five Prizes were also given to other varieties. On the whole most of the birds exhibited were much above the ordinary and some of them very good.

APPENDIX.

Class V.—Dairy Produce.

Very little was shewn. We think the notice respecting its being given in on the 1st day of the Show was not well known. Prizes were given for some Dacca cheeses, and for ghee and buffaloe ghee, but nothing was shewn worth special mention except one specimen of butter prepared by Mrs. Abercrombie's Abdar.

DACCA AGRICULTURAL EXHIBITION.

Department II.

Agricultural Implements.

Report on the result of the Exhibition by the Judges appointed to award Prizes.

Class I., Prime-movers.—In this class nothing was exhibited.

Class II., Implements of Tillage.—In this class Messrs. T. E. Thomson of Calcutta exhibited two very fine English ploughs for which a Prize of Rupees 50 was awarded. The ground was unfortunately very hard in the neighbourhood of the Exhibition, otherwise it would have been interesting to have set them to work; the Natives crowded round these at all times and their use was explained to them.

Under this head also several Native ploughs were exhibited, to which four prizes were awarded, not so much from any intrinsic merit that they possessed as from a wish to encourage competition even in this low walk of the mechanical art. It was noticed that the ploughs, harrows, &c., from the different Districts had their own local peculiarities, but all appeared to have the same family likeness. There has probably been little change in these simple implements since the time of Cain and Abel.

Class III., Implements for hoeing and sowing.—Nothing was shewn under this head worthy of mention.

Class IV., Farm-yard Implements.—In this class Messrs. T. E. Thomson and Co. were again the successful exhibitors. A chaff-cutter was fitted up and caused great delight, to the Natives especially. This machine should, properly speaking, be called a *straw*-cutter, as it cuts up straw into small pieces, an inch long.

Messrs. Thomson and Co. also exhibited an enamelled iron manger with hay rack and water trough, which had a very substantial appearance. In this class Messrs. Thomson and Co. are the only Prize-holders.

Class V., Implements used in preparing produce for market.—In this class a number of odd looking machines were exhibited by the Natives, chiefly cotton gins, rice cleaning machines, and machines for expressing the juice from sugar-cane for which several Prizes were awarded.

A machine for shelling rice which was exhibited is a good example of what can de done by this rough and ready style of machinery.

Class VI., Irrigating Implements.—In this class there was nothing exhibited.

Class VII., Agricultural carriages and harness.—This class was also a blank unless we may except Messrs. Thomson's wheel-barrow made of iron, which was quite as light as a wooden one. This wheel-barrow was eagerly bought up by a Native gentleman and will no doubt form a "pattern" for years to come in Dacca, where this useful article is already occasionally seen.

Class VIII.—Blank.

Class IX., miscellaneous Machines and Implements.—In this class there was a tolerably good show. A complete set of tile-making machinery was exhibited by Mr. Stewart, the Executive Engineer. These were invented by him, and one remarkable point about them appeared to be that these machines might be made up by any country carpenter and blacksmith, a matter which deserves more consideration than it generally receives in this country.

Large half round tiles for roofing were made by these machines and also flat tiles for flooring with a pattern stamped upon them. The press in which these were made was a novelty in its way, and it was really a treat to see a perfectly square flat tile squeezed out of it, an improvement certainly on the shapeless tiles used in flooring in Calcutta and generally in India.

The inventor of these machines states that they turn out work cheaper than what the Natives can

work for when making the tiles by hand, and as there is no doubt about their turning out better work than is usually seen, they are well worthy of the attention of Government and others who have much to do with building.

These machines were all at work, and in addition to the tile machines several tables and barrows were exhibited with moulders at work to illustrate the system of brick-making generally adopted in England, a system which has been introduced with such success at Akra near Calcutta.

Mr. Stewart carried off three Prizes for these. Messrs. Thomson also received several Prizes for articles coming under this class, consisting of fitted axes, saws, &c., kodalees, cooking stoves, &c., and we are happy to say that a good many sales were effected, amounting to some 800 Rupees.

Messrs. T. E. Thomson and Co. deserve especial thanks for the way in which they have come forward on this occasion; although they had sent many things to other Exhibitions and had then a great deal in their hands connected with such work, yet they managed to contribute a very interesting collection of machinery and tools, and it was remarkable how the shed in which they were collected was constantly crowded with Natives of all ranks eager to understand the English contrivances and to admire the trusty steel of Sheffield.

Department III.

Agricultural Produce and Raw Material.

In the absence of my colleagues, I beg to submit the following brief report of the Country Produce Department of the Agricultural Show. The Exhibition in this as well as in the other Departments has, in my opinion, been very successful. Some of the produce were the best that I have seen in my experience of many years, and even of those that did not obtain a prize may be said to be of very fair average quality, and will, I hope, lead to the improvement of the Agriculture of the country as well as that of the people.

Cereals.—The specimens of wheat exhibited were few but of very good description. The best samples were exhibited by Baboo Bugwan Chunder Roy, to whom the first and third prizes were awarded for white and brown wheats. Mr. A. Thoms received the second prize.

There were upwards of 150 samples of rice of good average quality exhibited. The best scalded rice came in from Meer Tujumul Ali of Burrisaul, who carried away the first prize. Besides the six prizes awarded in the Catalogue there were four special prizes also given to Meer Tujumul Ali, District Committee, Backergunge, Hajee Budderodeen and Kristo Persaud; three of these samples were from Burrisaul and one from Dacca.

Pulses.—The collection of pulses were also large. Baboo Mohesh Chunder Gangooly was an exhibitor of about fifty kinds of peas, &c. He carried the first prize for kollye and a special prize for his large collection of pulse. All the specimens exhibited by him were particularly clean, and it is doubtful whether these could have been the average samples of five maunds of peas. Mr. T. J. Kalonas and Mr. Thoms of Phoolbarry exhibited very white and bold specimens, for which they respectively received the first and second prizes. Baboo Bugwan Chunder Roy received the third prize.

Tubers.—I have not much to say on this subject, except that only two samples of good yams were exhibited by Syud Abdool Mujeed and Baboo Kalli Narrain Roy. There were no potatoes, neither much competition in ginger, turmeric, and arrow-root.

Fibres.—There were but few samples of cotton exhibited, and those from Burrisaul, Mymensing, and Cachar. Among the exhibitors Captain Stewart of Cachar was the most successful.

Jute and sunn were exhibited in abundance and prizes distributed accordingly. There were two special prizes given to Mr. Henderson for jute grown in the Mymensing Jail, and to Mr. Hampton for jute grown in the District of Mymensing.

A special prize of Rupees 30 was awarded to Baboo Kalli Narrain Roy Chowdry for a new specimen of fibre similar to jute discovered at Bhowal. It was found growing wild and yet in this state its fibre is marketable. I believe if more care of it is taken and the plant regularly grown, its fibre will eventually assume so attenuated a texture as to be successfully employed in the manufacture of cloth. It has also a superior gloss. I beg to draw your particular attention to this new fibre. It is my intention to shew the plant, with its long stem of full thirteen feet, together with the fibre, to the Trade Association at Calcutta.

Oil Seeds.—Upwards of 100 samples of oil seed were exhibited, chiefly rape seed by Kalli Narrain Roy Chowdry, who carried away both the first prize and a special prize.

Linseed and teel seed were also largely exhibited from Mymensing, Burrisaul, and Cachar, and their exhibitors deservedly carried away several prizes.

Indigo.—It has been well represented. The best outturns were from Mymensing. Mr. Hampton carried off the first two prizes and Mr. Kerr the third.

Safflower.—As expected the safflower exhibited was very good. Baboo Muddun Mohun Bysack was awarded with the first prize.

Tobacco.—I am sorry to say that there were no very good exhibitions of tobacco.

Tea.—The exhibition of tea was pronounced by all most excellent. The Soorispoor Tea Company obtained the first prize, while the British Indian Tea Company and the Central Cachar Tea Company received the next two prizes. Mr. A. D. Dunne of Dacca exhibited two samples of very good tea from Assam and Cachar, but as the prizes intended was for the best collection of teas grown in any one of the plantations, he was awarded with a special prize of Rupees 50.

In conclusion I beg to bring to your notice that the fullest and widest publication of the encouragements held out for the Agricultural and other improvements by Government is necessary to rouse the people to develop the resources of the country. I beg earnestly to suggest that these Exhibitions be regularly continued, for in them is involved the best interests as well as the true improvement and right occupation of the Natives.

Department IV.

Some little difficulty was experienced in awarding prizes in this Department, not so much in

deciding upon the comparative merits of the articles exhibited as in finding where they had been placed. The cotton fabrics and the embroidery especially were not well arranged, so that several pieces fully deserving of attention escaped the notice of the Judges whilst the prizes were being awarded. This confusion arose, in great measure, from the fault of the exhibitors, the Dacca manufacturers having, in the first instance, refused to exhibit any specimens for which they were not paid; but at the last moment they were most eager to exhibit a quantity of goods for which sufficient space had not been left; and at the same time some contributions from the more distant parts of the Division did not arrive until the hour of opening the Exhibition. Such little drawbacks as these to perfect arrangement were perhaps unavoidable on this occasion; but on the occurrence of a second Agricultural Exhibition it will be desirable to lay down strict Rules as to the latest date on which articles can be admitted, and also as to notifying to the Committee in good time the amount of space required by each exhibitor. It will also be expedient that on the allotment of the required space under the proper Department and Class each exhibitor should be permitted to arrange his wares therein according to his liking, so that should any of them escape the notice of the Judges it will be the fault of the exhibitor himself. It is to be regretted that several Native manufactures, especially those of the commonest kinds, were not represented at all, as in these even a small improvement would be of the highest value and importance. The great variety of articles shewn in this Department, and the great difference in their value, rendered it necessary that the Judges should be left unfettered both as to the number and value of the prizes to be adjudged, and the Committee had most wisely contented themselves with placing a certain sum at the disposal of the Judges, who distributed it as they thought fit.

The first class to be noticed is the comprehensive one of cotton fabrics; of the finer kinds enough was exhibited to shew that Dacca muslins are still worthy of their former fame, and of some specimens so fine was the work that it became a question whether they should not be rather referred to the class of embroidery. The coarser kinds of cotton included some extremely good table napkins shewn by the Dacca Jail and A. Thoms, Esq., and also some of the work of the inhabitants of the Garrow Hills; but the ordinary cotton cloths worn by Natives of the lower and middle classes were not represented. Scarcely any woollen fabrics, the produce of the Dacca Division, were exhibited, and but few specimens of silk as such, the greater part of such fabrics being placed under the head of embroidery. Of plain tussah silk two good specimens were exhibited by Kalli Chunder Chowdry and T. R. Kerr, Esq., of the District of Mymensing.

Of fibrous fabrics there was a far larger show, and those shewn were of very good quality. The Jails of Dacca, Backergunge, and Mymensing shewed respectively how Convict Labour may be utilized in this as in other classes, and Rabatty Mohun Bysack and Nundloll Bysack of Dacca also exhibited most superior sacking. Baboo Kasheekant Mookerjee and Syed Abdool Mujeed also shewed curiosities in fibrous fabrics, such as plantain and kutchoo fibre, which were thought worthy of extra prizes.

The embroidery class was well filled, but some of the very best specimens were not on the table at the time when the Judges went round, having been removed from their proper places by the exhibitors, and others were not brought in until after the adjudication of the prizes; several extra prizes were, however, subsequently granted. Mr. Drummond, Baboo Gobind Chunder Dutt, Baboo Modhoo Soodun Doss, Hurri Mohun Doss, Abdool Mujeed, Chulloo Churn Ahmed Jew, and others shewed beautiful Indian embroidery and rendered the task of deciding between them one of difficulty.

The silver filigree work, for which Dacca has long been celebrated, was shown in some quantity, but the best specimen, that exhibited by Mrs. Dunne, being of Cuttack manufacture, was excluded from competition as not being made in the Division. The regular prizes were assigned to Gunga Churn, Mr. Fisher, and Mohun Bysack, an extra prize being adjudged to Mrs. Dunne; prizes were also given for gold and silver plate to Syed Abdeol Mujeed and Baboo Modhoo Soodun Doss, both of whom exhibited extremely handsome articles.

The hardware and cutlery shewn was curious, being collections of all the various implements used by the Natives of the Division; the first prize for number and variety was given to Raj Chunder Kurmokar of Burrisaul; the second to Syed Abdool Mujeed, and the third to J. W. Foggo, Esq. The exhibition in the pottery and earthen-ware class was disappointing both in quantity and quality. S. A. Stewart, Esq., of Dacca, shewed good tiles and bricks, but the bricks shewn by Furreedpore and Mymensing Jails were of very inferior quality, while the Native potters shewed little or nothing.

Under the head of glass no Native manufactures where shewn and no prize was awarded.

The first prize for furniture was given for a dear-horn stool to Rammanic Sing of Dacca; it was the only specimen shewn of its kind and was much admired.

The Jails of Backergunge and Furreedpore took the second and third prizes for cane furniture, that of the former being very well made; there were also some boxes and trifling articles of furniture shewn which received prizes.

The greater part of the carving in wood and ivory was excluded from competition as not being the produce of the Division. Mr. Stewart took the first prize with the carved pulpit intended eventually for Dacca Church, and the others were given for a well carved stick in ivory, some fans, and ornamental boxes.

No leather work was shewn and only one specimen of paper exhibited by Dacca Jail.

The next class included all fancy work in paper, wax, worsted, bamboo, beads, &c., and seven or eight prizes were awarded. The wax work imitations of birds and fruit were very good and some handsome plated screens and umbrellas were exhibited.

The arms and accoutrements shewn were few in number. Baboo Modhoo Soodun Doss gained the first prize with some swords and daggers, and the second was gained by a curiously shaped gun from Backergunge; the remainder of the compartment was taken up with pellet bows and blow pipes from Sylhet, and the ordinary daites, spears, shields of the country. Only one conveyance was shewn, a palanqueen, the property of Syed Abdool Mujeed, of superior finish.

Under the miscellaneous Prizes we may notice one awarded for a case of insects shewn by Ameeroollah of Sylhet, and collected for himself; it was thought by the Judges that every encouragement should be given to the study of natural history among the Natives, and a prize of Rupees 20 was given.

For models and statuary the alabaster and marble work shewn by Pietro Gueriari was excluded from competition as not being produced in the Division and prizes were given to colored clay figures made by Natives.

No engraving, painting, or lithographic was exhibited.

The prizes for photographs were given to Major Smith, of Mymensing, whose photographs were decidedly the best shewn, to W. Brennand, Esq., and to Mr. Clapham; some other very fine collections of photographs were sent in too late for competition.

The prizes for drawings were given to the performances of Native women with the exception of Goolzar Sing, employed in the Engineer's Office in Dacca as a Draughtsman; the first prize was given for a well executed colored drawing of an eagle to Sreemutty Uttum Sundri.

The musical instruments shewn were of Native manufacture, chiefly stringed; the first prize was awarded to a kind of violin shewn by Gobind Chunder Dutt Baboo of Dacca.

A prize was given to S. A. Stewart, Esq., for his revolving photographic camera.

The total amount awarded in prizes under this Department was Rupees 1,313, and it is hoped that they were distributed in such a manner as to guide the industry of Native manufacturers in proper directions, although the Judges regretted much, as has been already noticed, that several of the most useful, though ordinary Native manufactures, did not compete for Prizes.

Report of the Proceedings of the Agricultural Show held at Rampore Beauleah.

From C. H. CAMPBELL, Esq., Commissioner of the Rajshahye Division, to the Secretary to the Government of Bengal,—(No. 66, dated the 29th March 1865.)

IN continuation of my letters to you No. 178 of 24th October and of the 18th January last, the latter reporting the opening of the Agricultural Show of this Division at Rampore Beauleah, I have the honor to state as follows:—

2. From the receipt of the first orders on the subject I was in constant communication with the various District Committees who (particularly that of Rajshahye) were uniting in their efforts to further the interests of the Exhibition. I also presided at several Meetings at Rampore Beauleah (where my presence was especially necessary owing to the absence of the Magistrate) and at Pubna.

3. An admirable piece of ground was selected to the north of the Station, and this Baboo Obtar Sing, the proprietor, an old servant of Government, most liberally placed at the disposal of the Committee free of charge. Much, however, had to be done in the way of levelling, &c., to fit it for the purpose. Here extensive sheds, though not larger than proved necessary, were run up for the reception of the cattle, produce, &c., and the whole was surrounded by a high bamboo fence. Two very handsome gateways were constructed of bamboos and branches of trees by Mr. Blechynden, of the Rajshahye Committee. An extremely handsome semiana of very large dimensions for the opening scene was also erected, and the general effect, as well as arrangement of the enclosure, was excellent.

4. Nothing could exceed the interest which continued to be evinced by all classes in the Exhibition, which, I think, I may safely say, proved in every way a great success. As was natural, there were several things, such as arrangement of produce, adjudging of prizes, &c., which might have been improved upon if we had had more experience in such matters. This, however, did not at all interfere with the general result. Every Member of the Committee as well as myself felt that the experience gained on this occasion would be of great advantage on the next.

5. The show of cattle, produce generally, and poultry was very large and good. That of horses and sheep was but indifferent, and but little, I am sorry to say, was exhibited worth mentioning in the way of implements.

6. I had expected a large show of implements from Messrs. T. E. Thomson and Company, of Calcutta, with whom I was in correspondence, but as that Firm could not send any one, either European or Native, in charge of their collection, the Committee and myself were of opinion that their offer, with the conditions attached, could not be accepted.

7. The District of Rajshahye of course contributed the greater portion of the specimens exhibited. Distant Districts like Dinagepore and Rungpore could not be expected to do much, particularly in cattle. The show of grains, oil-seeds, jute, silk, sugarcane, &c, from Rungpore, Dinagepore, Pubnah, and Bograh was, however, very creditable, and shewed that the Committees of these Districts had taken much trouble. The careful and intelligent manner in which the

Pubnah Committee forwarded their specimens deserves particular commendation.

8. As previously reported, the Show opened on the day originally fixed, the 17th January, all the Zemindars of Rajshahye attending with their retinues, and the number of visitors, both European and Native, was very large. It remained open till the 21st January, when the prizes were distributed by me in the presence of nearly the same assemblage as met on the first day. There was an admission fee of one Rupee on the opening day, but after that entrance was free and thousands upon thousands from all parts of Rajshahye and other Districts visited the yard.

9. I beg to annex, for the perusal of the Lieutenant-Governor, a copy of the remarks made by me on the opening of the Exhibition.

10. The sum of Rupees 3,985 was distributed in prizes. The Committee ware obliged to withhold some of the prizes mentioned in the list (copy of which accompanies) owing either to non-competition or inferiority of specimen exhibited. On the other hand some prizes not in the list were awarded to exhibitors of articles which seemed to merit special reward. The successful competitiors included people of all classes from His Highness the Nawab Nazim, Messrs. Watson and Company, and the great Landholders of Nattore and Pooteah, &c., to petty cultivating Ryots.

11. The Silver Medal of the Agricultural and Horticultural Society of Calcutta was awarded for *silk* to Messrs. Watson and Company, the best specimens exhibited being from Surdah factory, in Rajshahye. The show of silk generally, which, as the Lieutenant-Governor is aware, is a great staple of Rajshahye and several of the surrounding Districts, was very fine.

12. I took every opportunity of explaining to people of all classes with whom I came in contact the objects of Government in setting on foot Agricultural Shows, and I think these objects are fully appreciated and understood, and that there is a very general desire that Exhibitions of this nature should become a permanent institution.

13. *Pecuniarily* there can be no doubt of the success of this year's Show. The following are the sums contributed by the several Districts of this Division to the Funds of the Divisional Exhibition :—

Rajshahye	...	... Rs. 5,450
Moorshedabad	...	... „ 2,397
Rungpore	...	... „ 1,500
Bograh	...	... „ 1,035
Dinagepore	...	... „ 800
Pubnah	...	... „ 600
Maldah	..	... „ 401

14. These sums, however, do not represent the whole amount actually collected. The various District Committees had to meet sundry expenses in the way of forwarding articles, &c. There were also local preparatory Shows (which I hope, on future occasions, to see at every Station of the Division) at Rungpore, Dinagepore, and Bograh, and at those prizes were also awarded.

15. After paying all expenses of every description there is still to the credit of the Divisional Committee a sum of about Rupees 8,000 including the Government grant of Rupees 3,000.

16. On the whole, I consider, the results of the Exhibition of this year afford in *every way* great inducements to go on with the scheme proposed by the Lieutenant-Governer, and with his sanction I would propose to hold the next Divisional Exhibition at Berhampore, where many Native gentlemen are, I know, most anxious it should be held, and where, I am confident, it would be successful.

17. In conclusion I would bring to the special notice of the Lieutenant-Governor the gentlemen as per margin of the Rajshahye Committee, to whose valuable and untiring exertions the success of the past Exhibition is very greatly owing.

Mr. Ferrar, Secretary to Divisional Committee.
Messrs. Blechynden, Gallais, and Baboos Mothooranath Banerjee and Anundchunder Banerjee, Members.

Ladies and Gentlemen.—I think myself exceedingly fortunate that one of my first public acts in the post which I have the honor to hold should be to preside on an occasion like the present, an occasion which I believe to be fraught not only with pleasure to the many hundreds I see around me, but with lasting benefit and material improvement to the inhabitants of these Districts. Doubtless you are all anxious to commence your inspection of the various animals and produce which, by the kindness of individuals in every District of the Division, has been so liberally contributed to the Exhibition which is now about to open under your auspicies, I shall therefore trespass but a short time on your patience. First, I would mention, what many of you are doubtless aware of, that the display we see around us is one of the many excellent results of the great Calcutta gathering of last year. All parties connected with that Exhibition were agreed that by it a great impetus had been given to the cause of Agriculture, but it was at the same time felt that to be of any lasting advantage it should be the first of a long series of similar Shows both in Calcutta and the interior. With this view, accordingly, the present Lieutenant-Governor of Bengal, whose name must ever be inseparably connected with scenes like this, obtained a grant of Rupees 30,000, and of this Rupees 3,000 has been placed at the disposal of each Division for the purpose of aiding in an Agricultural Exhibition to be held in some District of the Division, the remaining portion of the expenditure being met by private subscription. My own idea is that, besides the Divisional Exhibition, each District should have an annual one of its own, and I think all here will agree with me that it is highly desirable such a meeting as the present should not be allowed to drop, but should become a permanent institution of Rajshahye.

There is nothing, I believe, which would take a great hold on the people of this country, a people who are essentially Agricultural, than Exhibitions of this nature. The thing till last year had never been thought of, but every attempt that was then made proved a great success and amply shewed how exceedingly the thing was suited to the habits and disposition of the people generally. It is not so very long ago that Agricultural Shows were first introduced in England. All nations of Europe have, in this, followed in the wake of England, and to nothing is the improvement in general husbandry, in implements and animals, more owing than to meetings of this kind at which all the people interested in Agriculture can meet in a friendly manner, compare their different systems, and thus be enabled to avoid the errors and profit by the successes of each other. It has been said by some no improvement can be looked for from the Ryots, and that nothing will convince them that the practices of their fathers are not the best possible. From this opinion I, for one, greatly differ. I believe there are no more practical people than those of this country, and that, as soon as a Ryot thoroughly sees it is to his advantage to change his system, or his implement, always provided, of course, the change is within his means, that instant will he adopt it. We have only to look at the vastly increased cultivation of jute, cotton, date tree, &c., to have a proof of this. At the same time every one must admit that Agriculture in this country is still in its infancy, and that the plains of Bengal, perhaps the richest soil on the earth, might, under an improved system, produce vastly more abundant and more valuable produce. It cannot, however, be expected that the Ryot can, unassisted, do much. Agriculture must, as in England, be taken up as a means of livelihood by a more monied class than at present, and the great lords of the soil must, as in England, shew a lead in the matter and take a practical interest in it. Doubtless it would here, as in England, be found an intensely absorbing and amusing pursuit. It is true experimental Agriculture, and what is called in England gentlemen farming, does not, as a rule, result in actual pecuniary gain to those who engage in it, but the benefit that accrues to their tenantry and poorer neighbours, as well from their failures as their successes, is incalculable, and cannot but amply compensate them for any small loss they themselves may sustain.

I would therefore most strongly recommend to the many influential Native Landlords I see around me to do as is done in England, namely, keep 600 or 800 beegahs of land in their own hands, cultivate it by their own paid servants, make various experiments in Agriculture, carefully noting the results and reporting their proceedings to the Agricultural Committee of the District, which, I hope, may become a permanent institution. These reports, or at least such of them as were approved by the Committee, might be published, and the Committee might, at the same time, have all useful books or pamphlets on Indian Agriculture translated and circulated throughout the District. It is astonishing what can be effected by a few of the upper class, thus intelligently and zealously taken up such a subject as Agriculture, the value of lands might, I am convinced, be easily trebled if you yourself would but put your shoulders to the wheel; one very successful piece of Agriculture we see around us this day. The land on which we are now assembled, and which has, with so much liberality and good feeling, been placed at the disposal of the Committee by Baboo Obtar Singh, an old and faithful servant of Government, and which has to-day borne such a splendid crop of all that is fair in nature, was but a few weeks ago a rough piece of wilderness, so to speak. The Ryots, however, that is, my friends of the Rajshahye Committee, have worked, as I think all will allow, with exceeding energy and intelligence, have reclaimed the waste land in a wonderful manner, and have produced a crop which is truly surprising to behold. I think I may safely, both in your name and my own, thank them most heartily for their labour and exertions and at the same time the numerous and liberal contributors to the Funds of the Exhibition, particularly the Landlords of this District must not be forgotten. To their excessive liberality it is mainly owing that the present scene is now before us. Ladies and gentlemen, I need not now detain you longer. In conclusion I would again thank the various Committees of the Division, and, if I may be permitted to mention a few names, I would especially mention our laborious and intelligent Secretary, Mr. Ferrar; that host in himself the ingenious and and indefatigable Mr. Blechynden; Monsieur Gallais, who has worked with true French energy; Baboos Annundchunder and Mothooranath Banerjee, who have throughout rendered most valuable assistance such as only Native gentlemen could afford, and Mr. Pereira, whose professional knowledge has been of the greatest aid to the Committee. I have only now to add that I trust, and earnestly hope, that his Exhibition, which is now on the point of opening, may be the precursor of a long line of similar Exhibitions, and that, by their means, the happiness and material prosperity of all classes of this fast community may be greatly strengthened and increased.

C. H. CAMPBELL,
Commissioner.

Rates to be charged in granting Leases for the cultivation of Waste Lands.

From R. B. CHAPMAN, Esq., Secretary to the Board of Revenue, Lower Provinces, to the Secretary to the Government of Bengal,—(No. 85, dated the 20th March 1865.)

WITH reference to paragraph 3 of Government order No. 4036T., dated 7th October, I am directed by the Board of Revenue to state that there is an important difference of opinion between the Commissioner of Dacca and the Deputy Commissioner of Cachar as to the rates to be charged henceforth in granting leases for the cultivation of Waste Lands.

2. Captain Stewart proposes that the rates per acre should be from the eighth year, 6 annas; from the thirteenth, 12 annas; and from the eighteenth, Rupees 1½. Mr. Buckland suggests Rupee 1, Rupees 2, and Rupees 5. In Chittagong the highest rate proposed (and sanctioned by the Board of Revenue) is 6 annas, (from the sixth year,) and even at that rate the Local Authorities do not anticipate that lands will be taken up for Tea-planting. In Cachar, on the other hand, the Deputy Commissioner does not seem to doubt that Tea-lands would bear even the high assessments proposed by the Commissioner, but he thinks, nevertheless, that lands would not at present be taken up at that assessment, and that, if applied to rice lands, it would be absolutely prohibitory.

3. The Government orders quoted in my 1st paragraph leave to the Board a very wide discretion in fixing these rates. The question, however, now before them is so much one of *principle* that they think it better to take the orders of Government upon it.

4. It is to be borne in mind, I am to observe, that the lease-hold tenure is not one imposed upon Tea planters who have their own reasons for prefering it to the free-hold tenure, which they can purchase. There is no object in making the terms of the leases so favorable as to encourage a preference for them.

5. If the Government is to be left saddled with proprietary responsibilities it may, the Board think, claim a fair share of the profit which its land will yield.

6. The Board are inclined to think that separate rates and terms may be adopted for Tea-lands and Rice-lands. Such a distinction would be in accordance with the well recognized principles upon which land revenue is ordinarily assessed in India. In Cachar the "Mirásdar" who merely means to grow Rice will be satisfied with a much shorter term of lease than the European Capitalist who means to grow Tea. There are many tracts on the hills which are unsuited for Tea.

7. Ordinarily, the Board apprehend, the two classes do not come into competition. The Rice cultivator restricts his application to a few hundred acres all, or nearly all, suited for Rice cultivation. The Tea Planter applies for all that he can get of an insufficiently examined tract embracing a few hundred acres which promise to produce tea. The Board would carefully avoid doing anything to discourage the Native applicants for Rice cultivation. A plentiful local supply of that staple is of the greatest importance to all parties. In regard to this cultivation probably no innovation at all is necessary.

8. But the Board see no objection to the imposition of relatively higher rates upon Tea lands, and they would let it be understood that on the renewal of the leases on expiry the reasonable increase of rent to which the Planters will then be liable will bear some proportion to the actual profits obtained or obtainable from the land by the lessees.

9. If therefore the Government approve of this principle the Board will fix differing rates for Rice and for Tea lands, not only in Cachar, but, as far as possible, in the other Tea Districts also.

From the HON'ABLE A. EDEN, Secretary to the Government of Bengal, to the Secretary to the Board of Revenue,—(No. 1392, dated the 10th April 1865.)

I AM directed by the Lieutenant-Governor to acknowledge the receipt of your letter No. 85, dated the 20th ultimo, and in reply to say that if, as believed by the Deputy Commissioner of Cachar, the rates proposed by the Commissioner of Dacca for the grant of leases for the cultivation of Waste Lands are so high that they are prohibitory in the case of Rice lands, and that even Tea-lands, though they might eventually bear such an assessment, would not at present be taken up at those rates, there is abundant reason why they should not be adopted.

2. It may be true, as the Board remark, that there is no object in making the terms of a lease of Tea land so favorable as to encourage a preference for the lease-hold over the free-hold tenure. On the other hand, it is equally certain that the terms of such leases ought not to be so high as to drive those who desire to possess Tea lands to the alternative of purchase in fee-simple, especially as the lease-hold tenure, while it encourages the operations of small capitalists, gives room for the future improvement of the Public Revenue.

3. As regards the Board's proposition for varying rates, I am to say that His Honor is of opinion that there is no objection whatever to the adoption of varying rates in a District according to the productiveness of the soil, or the advantage of market, or even, to a certain extent and under some circumstances, according to the nature of the crops that can be grown upon it; but it seems to the Lieutenant-Governor both unfair and impolitic to make a broad distinction between Tea lands and Rice lands, and to say that the former shall be assessed uniformly at a higher rate than the latter. The capital expended in making Tea lands productive, and the loss of interest during the first few years after the land is cleared and the young trees come into bearing, must not be lost sight of; nor must it be forgotten that what is a moderate rent for ordinary Rice land in some parts of a District may be too high a rent even for the best garden lands in other parts.

4. The Lieutenant-Governor is unable to lay down any rates, as there are no sufficient data before the Government on which he can safely do so; but His Honor agrees generally with the Board in thinking that the rates now adopted in leases of *Waste* Land for ordinary cultivation in Cachar are probably high enough, and assumes that the same rates may very properly be adopted in the case of Tea lands seeing that the cultivation of Tea involves an expenditure of capital and skill very far beyond what is needed for the cultivation of Rice. It has, moreover, been repeatedly declared

a general principle of universal application that lands appropriated to the growth of artificial and valuable crops are to be subject to the same assessment as lands of the same quality and advantages under ordinary crops, and that no additional assessment should be imposed upon "the intelligent employment of capital in the cultivation of the more valuable products."*

* *Vide* Resolution of the Government of India, dated 26th March 1838, (latter part of paragraph 2,) forwarded to Board with letter No. 534, dated 27th March 1838.

5. With regard to the 8th paragraph of your letter, I am to state that the Lieutenant-Governor adheres to the Rule laid down in paragraph 4 of the orders No. 4036T., dated the 7th October last, namely, that the assessment to be adopted at the renewal of the leases will never exceed one-half of the gross rental calculated either on the actual assets, or on a fair estimate of what the Estate may be worth to let. If the Board's present proposal means anything more than this, His Honor must dissent from it. At the renewal of the leases the ordinary and accepted Rules of assessment will still be applicable, and the lands will be assessed according to their capabilities in conformity with the principle adverted to in the preceding paragraph.

6. I am at the same time to remind the Board that, although it may be right to adopt uniform rates in giving leases of *Waste* Lands in any District, in the re-assessment of these lands on the expiry of the lease the rates should invariably be regulated according to the ascertained quality and productiveness of the soil and to the rents actually prevailing in the neighbourhood. On this point I am to refer the Board to paragraph 10 of orders No. 1765T., dated the 22nd July 1864.

7. In conclusion, the Lieutenant-Governor desires me to observe that the rent-free period now proposed by the Local Authorities for leases of Waste Land in Cachar is eight years; that hitherto the rent-free period in Cachar has been three years; that the Board, on a former occasion, doubted the necessity even for so short a rent-free term, and that no reasons are given for the proposed extension, which appears, in the absence of such reasons, to be much more than sufficient as an inducement to the clearance of either Tea or Rice lands.

The 4th May 1865.

The following Draft of Rules having reference to the Canals from Colooharia to Midnapore and from the Roopnarian River to Balasore, called respectively the MIDNAPORE CANAL *and the* BALASORE CANAL, *is published for information under the provisions of Section XI. of "the* CANALS' ACT, 1864,"—(*No. V., B. L. C.*)

I. EVERY Vessel on entering either of the above Canals shall be liable to measurement for the purpose of ascertaining the amount of toll the Vessel should pay according to the Schedule of rates authorized by Government to be charged on the Canal.

II. The tonnage of every Vessel, whether laden or empty, shall, for the purposes of the "Canals' Act, 1864," and of these Rules, be determined by the following measurements:—

a. The product of half the length of the Vessel from stem to stern measured along the water line, multiplied by the interior greatest breadth of the Vessel, multiplied by the depth from the water line to the bottom of the Vessel, is to be taken as the number of maunds upon which toll shall be levied.

b. The measurement of the length is to be made in feet rejecting inches, and the measurment of the breadth and depth in feet and quarters of feet rejecting portions of less than a quarter of a foot.

c. In calculating the amount of toll to be levied any fraction of 100 maunds less than 25 maunds is to be omitted; exceeding 25 and not exceeding 50 maunds is to be charged as 25 maunds only; exceeding 50 and not exceeding 75 maunds to be charged as 50 maunds only; and exceeding 75 maunds as 75 maunds only. Above one thousand maunds no fraction of 100 maunds is to be charged

III. Every Vessel entering a Canal shall be furnished with a ticket on paying the prescribed toll. The ticket shall specify the Station at which it has been issued, the name of the person in charge of the Vessel, the date the Vessel entered the Canal, the point to which it may proceed in the Canal, the maundage of the Vessel, the amount of toll charged, and the number of days for which the Vessel may remain in the Canal, and the date of such last day. The number of days which the Vessel may remain in the Canal without additional payment shall be calculated at the rate of one day for every eight miles or portion of eight miles to be traversed.

IV. Toll may be paid at the first Station either for the entire number of Toll Stations on the line of navigation, or for any less number of Stations.

V. The tickets thus given may be demanded for inspection by any duly authorized Canal Officer, and must be kept on board and at hand for that purpose. They must be shewn at each Toll Station the Vessel has to pass as a Passport that no further payment of toll is to be demanded. The tickets shall be delivered up at the last Toll Station.

VI. Owners of Vessels may compound by the payment of a fixed sum for the use of the whole or a portion of a Canal for any period that may be agreed upon, not exceeding one year. Each Vessel so compounded for shall be furnished with a ticket shewing the amount of toll paid, the period for which the toll has been compounded for, and the limits of the Canal within which the Vessel may pass; such ticket shall be kept on board the Vessel and shall be produced when required under Rule IV, but shall be given up only on the date of the expiry of the period for which granted and at the Station from whence issued.

VII. Duplicates of lost tickets, of which the numbers and the dates of entry can be satisfactorily established, will be granted by Officers in charge of Toll Stations on payment of a fee of one Rupee.

VIII. Vessels remaining in the Canal for a period exceeding that allowed under Rule III. will pay a demurrage of eight annas per 100 maunds per diem for each day or part of a day that they may remain in excess.

IX. No boats above 18 feet beam over all, and no rafts or floats of more than 10 feet width and 150 feet in length will be allowed to enter the Canal.

X. It will not be compulsory for the locks to be opened to single Vessels of less than 500 maunds burden, except in the case of mail or dispatch boats; but the locks shall be opened for the passage of boats at least twice a day.

XI. Vessels must have their masts fitted so that they can be let down with ease and speed, and when under sail Vessels must always keep in the middle of the Canal; when being tracked Vessels are, as far as practicable, to keep to their port or left side of the Canal.

XII. All Vessels anchoring at night are to keep to their port or left bank of the Canal.

XIII. Only one Vessel shall be allowed to make fast along and in a line with the Canal banks,

and no Vessel shall be made fast, or be placed outside of Vessels so secured without the permission of a Canal Officer. No Vessel shall, however, be placed in such a position as to endanger the safety of other Vessels, to obstruct their passage, or to impede the navigation; and no bamboos or poles shall be allowed to be erected on Vessels when at anchor: any infringement of this rule will be punishable by a fine not exceeding Rupees 5 for each offence.

XIV. Every Vessel when put to shall be securely fastened and shall at all times have some person in attendance on board of it: any infringement of this rule will be punishable by a fine not exceeding Rupees 5 for each offence.

XV. In every case of wreck or obstruction of the channel by sunken Vessels, the Canal Officer may call upon the person in charge of the Vessel to remove the same without delay, and shall give every reasonable assistance towards so doing. But should the owner of the Vessel or raft be not forthcoming, or should he not use reasonable expedition in removing the obstruction, or should he decline or fail to use proper assistance which may be offered to him by the Canal Officers, these Officers may undertake the removal of the obstruction themselves at the cost of the owner of the boat, recovering the expense in the manner laid down in Section IX. of "the Canals' Act, 1864."

XVI. If the Canal Officer be unable to ascertain the name and place of business or of abode of the owner of the cargo of any Vessel or Boat seized under the Canals' Act, he shall notify the seizure in the most public manner available.

XVII. The banks or berms of the Canals shall not be used as wharves for the deposit of goods under a penalty of 10 Rupees for each offence; but except in special cases, when the permission of the Canal Officers will be necessary, all articles shall be removed to the outer bank of the Canal and all such articles as shall not be finally removed from within the Canal boundaries within a period of 6 days after being so deposited shall be liable to a charge of four annas per 100 maunds.

Measures taken for the relief of Villages of the Nuddea Division which suffered from the Cyclone.

From H. L. DAMPIER, ESQ., Commissioner of the Nuddea Division, to the Secretary to the Government of Bengal,—(No. 253, dated the 18th November 1864.)

I HAVE the honor to report as follow, for the information of His Honor the Lieutenant-Governor, the proceedings of Mr. McNeile, from 23rd October to 16th instant, on his expedition to grant relief to the villages which have suffered most by the Cyclone of the 5th ultimo.

2. Mr. McNeile started on the *Teesta* on the morning of 23rd October with the stores noted in margin and with eighteen distributing Gomashtahs.

4. On the 16th the Steam Tug *Frances Gordon* was sent down to Mr. McNeile with the provisions noted in the margin, as it was not safe to take the *Teesta* out further than Channel Creek. Mr. McNeile made over a cargo boat full of provisions to Mr. Fraser for Saugor Island with water casks. Stores were also deposited at the places named in the margin on the western bank.

5. A third supply of stores was sent down to Mr. McNeile on the *Teesta*, which were deposited at Diamond Harbour and Moyapore.

6. Mr. McNeile states :—"I have only in conclusion to observe that my thanks are due to Captain Williamson, of the Steam-ship *Teesta*, and Captain Spain, of the Steam Tug *Frances Gordon*, and to most of their Officers, for the ready assistance which they rendered me throughout the expedition. To the useful aid received from Mr. Thompson, of the *Swiftsure*, I have already alluded. It is scarcely necessary for me to make special mention of the energy and zeal with which the Revd. Mr. Payne has joined in the work. But for his help I could not have done in the same time above half the work which has actually been performed."

7. Mr. McNeile again left on the *Teesta* on the 8th with stores; he reports that distribution of food gratis to able-bodied men has been discontinued on the eastern side of the river; but the quantity served out at once to women and children has been doubled, so that they may take away enough for two meals at once.

8. Saugor Island is the exception. Here they must be fed for an indefinite time, but as only 1,500 people are left on the Island no supplies will be required till next month. Distribution to able-bodied men has been discontinued, because there is a large demand for labour from four to six annas a day in putting up houses of the wealthier people; the embankment works of the Public Works Department have commenced all along the river on the eastern side, but as the Public Works Department only pay about two and a half annas a day, Mr. McNeile reports that they do not get

even as much labour as they require for their purposes. It appears that no work of any kind is yet procurable on the Midnapore side; supplies of food must, therefore, continue to be distributed gratis on that side for the present. Rotten rice is being largely consumed there.

9. Mr. McNeile recommends that large supplies of clothing, of string, and implements for making houses be sent down.

10. The proposal is now before the Relief Committee; a good deal of cloth has already been sent down.

11. There is reason to apprehend that in a few weeks, when the river water becomes salt, there will be great distress for want of drinking water. The Local Officers have been directed to do all in their power to get the salt water baled out of the tanks. Mr. McNeile reports that the people on this side are doing so; they and their families are fed gratis while the bailing is going on, and fresh water is brought into the tank when baled out by a cut connecting it with the nearest tidal khal. More systematic and general measures are recommended which are now before the Relief Committee. On this subject I have the honor of addressing the Government specially if necessary.

12. Mr. McNeile tells me that the country on this side of the river is gradually reviving, the hâts are being held, and the people are resuming their occupations.

13. At present I have only accurate information as to the effects of the Cyclone on Saugor Island. A clean sweep has been made of the Island. Out of a population of 5,625 people 1,488 only are left, and of these 802 only are men. 7,022 head of cattle and 3,565 houses have been swept away. These details have been furnished to me by Mr. Hugh Fraser, and they were not obtained without great personal labour.

14. The Surveyor-General has asked me to supply him with minute information as to the course and effects of the Cyclone in this Division; and it is desirable that as much information as possible should be collected as to the loss of life and property in the 24-Pergunnahs beyond the Suburbs. I have suggested to the Magistrate that if Mr. Verner's work of cleaning the Suburbs is finished he should be deputed to make a complete report, founded on his own local enquiries, and containing the required information, on the above points. The work will probably give him occupation for a few weeks.

From H. L. Dampier, Esq., Commissioner of the Nuddea Division, to the Secretary to the Government of Bengal,—(No. 35, dated the 4th April 1865.)

In continuation of my Report No. 253, dated 18th November last, I have the honor to submit copy of a letter and a narrative drawn up by Mr. H. A. Cockerell, Magistrate of the 24-Pergunnahs, describing the measures which have been taken under his immediate supervision for the relief of the sufferers by the Cyclone, and the provision of good drinking water, &c., in the affected District.

2. The 3rd and 4th paragraphs of Mr. Cockerell's letter refer to the scheme reported in paragraph 5 of my letter No. 240, dated 5th November last, under which I divided the part of the District which had suffered into eleven Circles, in each of which enquiries as to the destitution caused in the different families were carried on systematically, and in as much detail as was practicable, either by a Government Officer or by some non-official gentlemen who offered his services for the purpose. Until I left Calcutta on circuit these arrangements were under my own immediate superintendence. On receipt of the reports, I laid them before the Relief Committee, who supplied me with funds for distribution in the shape of pecuniary relief. On leaving Calcutta I requested Mr. Cockerell to take my place. Above Rupees 60,000 have thus been distributed in pecuniary donations in the southern part of the 24-Pergunnahs, which District also received its portion of the stores costing above Rupees 90,000 which were sent down.

3. To the Revd. Mr. Driberg, the Revd. Mr. Harrison, the Revd. Mr. Kerry, Baboo Degumber Mitter and Mr. Hugh Fraser, the gentlemen who undertook the enquiries above referred, my best thanks are due.

From H. A. Cockerell, Esq., Magistrate of the 24-Pergunnahs, to the Commissioner of the Nuddea Division,—(No. 361, dated the 17th March 1865.)

With reference to the orders of Government marginally noted, I have the honor to submit the accompanying Memorandum, shewing what was done under my superintendence to distribute relief to sufferers by the Cyclone, to carry out operations for clearing the tanks that had been fouled, and to alleviate to some extent the sufferings of those attacked by epidemic cholera and fever.

No. 6208, dated 31st December last, annexing a copy of the Officiating Secretary to the Government of India, No. 5743, dated the 24th November last.

2. The duties undertaken by Mr. McNeile having been separately reported by that Officer to Government are not alluded to in my report, neither have I referred to the distribution of pecuniary relief throughout the several Circles into which the District was divided by you, the scheme having been carried out under your own immediate superintendence until you proceeded on tour.

3. The Returns sent in by the gentlemen noted in the margin were received by me after your departure and laid before the Central Relief Committee. The amount of relief applied for was beyond what the Committee considered themselves justified in granting; finally a sum of Rupees 10,000 was made over to me for distribution among the Circles in question. Owing to the numerous deaths from sickness the circumstances of the villages mentioned in the several Returns had so altered that these Statements could no longer be entirely relied on; the service of the gentlemen who had originally made the enquiries, were no longer available. I considered that I should best carry out the wishes of the Committee and secure the distribution of relief to those most in need of it by handing over the amount in equal sums to the Revd. Messrs. Driberg and Harrison, who kindly undertook, at my request, to superintend the distribution of the amount.

Baboo Hemchunder Kerr.
" Ruttunlal Ghose.
" Bunkim Chunder Chatterjee.
" Prohmonauth Sein.
" Degumber Mitter.

4. The Statements prepared for the several villages were made over to these gentlemen, but in so doing I informed them that they must (owing to the altered circumstances of the villages from many causes) be considered more as giving generally the names of the villages where relief was required than as affording reliable information regarding those of the inhabitants who were most in need of pecuniary aid.

I have not yet received the final report from Messrs. Driberg and Harrison.

MEMORANDUM.

MR. ROBINSON has already forwarded to Government a Memorandum of his proceedings in the distribution of relief to the sufferers by the Cyclone, and therefore it is needless again to enter into particulars regarding them.

Distribution of Supplies.—On the Magistrate re-joining his appointment on the 2nd November, it was arranged with Mr. McNeile that the relief operations could be most advantageously carried on by the Magistrate superintending the Relief Depôts in Baroepore and in the parts of Diamond Harbour that were furthest removed from the River Hooghly, and by Mr. McNeile taking charge of those on the Hooghly River Board. Mr. McNeile has forwarded direct an account of the operations conducted under his superintendence, and accordingly this Memorandum only alludes to that portion of the relief operations which was conducted under the superintendence of the Magistrate of the 24-Pergunnahs. Four Depôts for the relief of the sufferers were established at the Villages of Byesattah and Teelpee, in the Baroepore Sub-Division, and Ramchunderpore and Bocooltollah, in the Diamond Harbour Sub-Division.

Mr. Robinson had already forwarded to these Depôts a large quantity of food and other supplies, and in the end of the month of November Mr. Cockerell sent an additional supply, consisting of rice, 300 maunds; salt, six maunds; cloth, two bales in 100 pieces; blankets, 100. The Deputy Magistrate of Baroepore distributed these goods among the four Depôts. On the 2nd December it having been intimated that work was to be found for able-bodied men on the Government bunds, the Deputy Magistrate of Baroepore was directed to put a stop to the indiscriminate gratis distribution of supplies, and that no able-bodied men or women capable of working should receive supplies except for work done, but that the aged and sick, the widows and orphans, might still be allowed a small support from the store when they had no one to maintain them.

In a letter dated December 16th the Deputy Magistrate informed the Magistrate that the Relief Depôts at Byesattah, Teelpee, and Bocooltollah were abolished, as the necessity of affording relief in food no longer existed in and about these villages, and that the Depôt at Ramchunderpore had been removed to Bigpookooria.

The want of additional Depôts to supply the necessities of the inhabitants of the south of the Sudder Sub-Division and of the north of the Diamond Harbour Sub-Division being evident, Mr. Assistant Verner was ordered to proceed on the 11th November to this part of the District. He selected the villages of Rajahaut and Daveepore as convenient sites for the purpose, accordingly a Depôt was established at each of these villages, and they remained under the immediate supervision of the Magistrate himself.

To the six Depôts established at Teelpee, Byesattah, Ramchunderpore, Bocooltollah, Rajahaut, and Daveepore the total amount of relief sent was as follows:—

800 maunds of Rice,
200 „ „ Dal,
16 „ „ Salt,
600 yards of Madapolam,

and a considerable supply of Blankets.

Tanks.—The Cyclone of the 5th October deteriorated the water in many of the tanks throughout the whole of the southern portion of the District of the 24-Pergunnahs, but nowhere was the water in the tanks rendered so thoroughly impure as in the Diamond Harbour Division and in small portion of the Baroepore jurisdiction. In these places in addition to the noxious chemical action caused by the trees, houses, roofs, dead animals, and other matter rotting in the tanks, the water was rendered both injurious and unpalatable by the brackish water of the storm wave.

During the end of the month of October and the beginning of November a considerable number of tanks were cleared without any special agency. This was effected in two ways; first, by the Local Officer insisting upon the owners doing the work when able so to do; and secondly, by the agency of the people obtaining relief at the Committee's Depôts. But it became necessary if any steps were to be taken to clean the tanks fouled by the Cyclone that operation on some more systematic plan should be undertaken. The Magistrate therefore submitted a scheme to the Commissioner, which, with his approval, was laid before the Cyclone Relief Committee, who granted a sum of Rupees 5,000 to supplement the Government fund, amounting to Rupees 2,500, at the disposal of the Magistrate for this purpose. The Sub-Division was divided into three Sections. The large Thannah of Sooltanpore being entrusted to Baboo Brohmonauth Sen on special duty. Baboo Dwarkanauth Banerjee undertook the operations in Thannah Daveepore, and the Deputy Magistrate of Diamond Harbour those in Govindpore and Bankipore.

Diamond Harbour.—The plan sketched out for carrying out the work was the following:—

To each Thannah was allotted the sum noted in the margin.

	Rs.
Bankipore ...	1,800
Govindpore...	1,500
Sooltanpore...	2,700
Daveepore ...	1,500

Each Thannah was to be divided into Circles, comprising from ten to fifteen villages; each Circle was to be superintended by a Gomashtah. These Gomashtahs were at once to prepare Returns, shewing the number of tanks in their respective Circles in want of cleaning, the amount of cleaning requisite, whether thorough or partial, for each tank, the size of the tank, the capability or otherwise of the owner to cleanse the tank at his own expense, and other like particulars.

Officers were directed to offer liberal terms to contractors with a view to having the work done expeditiously, and were cautioned against allowing it to be for the interest of the contractors to delay the completion of the work.

They were ordered to issue Perwannahs to the neighbouring Zemindars, explaining the desired object, and asking for their assistance, and, in the case of those owners who were capable of cleaning their tanks, to direct them to commence at once, and should they not comply with this direction, to have the work done and realize the cost from the proprietors subsequently.

When the owners were too poor to incur the expense of cleaning their own tanks, the Deputy Magistrate was to do it for them from the fund at his disposal. In those places where food was distributed by the Relief Committee, efforts were to be made to induce the inhabitants to clean their tanks by payment in food, &c. In many instances this was successful, but generally the Natives shewed great indisposition to work, unless for money

payments, even though that work was for the immediate advantage of themselves and their families.

The tanks were divided into three classes—first those which merely required the removal of vegetable and other rotting matter from the water; secondly, those which, owing to the essential impurity of their water, required baling out; and thirdly, those which required deepening as well as cleansing. Vegetable matter removed from the water was to be immediately dried and burned so as to avoid pestilential vapours. In order to facilitate matters printed notice in the vernacular, to be served on owners of tanks, were transmited to the Deputy Magistrate

The tank-clearing operations were prosecuted with unabated vigour up to the middle of December, when they were greatly checked by the epidemic cholera and fever which broke out throughout the greater portion of the Diamond Harbour Sub-Division.

Many of the persons who had entered into contracts to cleanse the tanks were carried off by disease, and their contracts, in consequence, remained unfulfilled, while in other cases both the Government and contractors were unable to obtain labourers for the work through the general feeling of despondency and apathy that prevailed among the inhabitants owing to the frightful ravages of the epidemic

From the 1st to the 25th of December operations were commenced and carried out on 183 tanks in Thannahs Govindpore and Bankipore, on 68 in Thannah Daveepore, and on 51 in Thannah Sultanpore; but after the latter date the work, for the reasons mentioned above, of necessity languished. The Magistrate, on being apprized of the difficulty of obtaining labourers, sent between two and three hundred Sonthal coolies to clear out the tanks in this Sub-Division, but on reaching the scene of operations these coolies absconded, being terrified by the epidemic.

As regards Thannah Daveepore, Baboo Dwarkanauth Banerjee reported, on the 31st January 1865, that from the beginning of December up to the date of the Memorandum 380 tanks in 231 villages had been cleared of vegetables and other noxious matter, that the water of 14 tanks had been baled out, and that arrangements for deepening two tanks had been made. The total number of tanks, therefore, operated upon during the months of December and January in Thannah Daveepore amounted to 396.

Baroepore.—The tank-cleaning operations in Baroepore as compared with those in the Diamond Harbour Sub-Division were on a very small scale. Instructions similar to those issued to Diamond Harbour were sent to the Deputy Megistrate, but the number of tanks requiring cleaning was so limited, that it was not considered necessary to apply to the Relief Committee for fund or to organize any special agency for the work.

Epidemic—Diamond Harbour.—On the 17th November the Deputy Magistrate of Diamond Harbour reported to the Magistrate that cholera and fever had made their appearance in several portions of the Sub-Division; the report was submitted to the Commissioner, with a request that extra medical aid might be sent to the Sub-Division. Sickness continued to increase. On the 8th December the Deputy Magistrate wrote that, with exception of Bankipore, fever and cholera in an epidemic form were prevalent to a frightful extent throughout his jurisdiction. The Government of Bengal was addressed, with a request that medical assistance might be at once sent to the Sub-Division, and in the mean time large supplies of cholera medicines, chlorodyne, quinine, &c., purchased at the expence of the Central Relief Committee, with instructions in English and the Vernacular, were forwarded direct to the Deputy Magistrate, with orders to distribute them as widely as possible through Zemindary Police, and any other persons of sufficient intelligence to undertake the work.

The epidemic reached its height about the 26th of December, and then suddenly abated considerably.

Baroepore.—Sickness did not prevail to any great extent in Baroepore Division until the middle of December. Supplies of medicines and instructions for use, with directions similar to those issued to Diamond Harbour, were at once forwarded by the Magistrate to the Officer in charge of the Sub-Division. The service of Native Doctor from Meherpore in Nuddea District, who had been transferred by the Commissioner to the 24-Pergunnahs, were placed at the disposal of the Deputy Magistrate. Orders were issued at the same time in both Sub-Divisions to put a stop to the sale of rotten putrid rice unfit for human food, which, it was known, had been purchased to considerable extent out of Ships sunk in the Cyclone and distributed through the South of the District.

It is unnecessary to enter into further details, as Mr. McNeile, when the epidemic was at its height, was especially deputed to superintend the arrangement for distributing medical relief throughout the infected tract. The reports of his operations had been submitted direct to Government.

Extract from Correspondence regarding portion of the Bootan Road from Gowhatty to Koomreekhatta.

From Major D. Briggs, Superintendent of Works in Assam, to the Officiating Chief Engineer, Bengal,—(No. 3153, dated the 13th April 1865.)

The Road to the Bootan Frontier from this to Koomreekhatta (43 miles) being almost completed, I will take this opportunity of briefly bringing to the notice of the Lieutenant-Governor of Bengal what has been done, and at what cost.

2. Work was commenced generally along the line on the 12th February last in the manner reported in my No. 2606 of the 15th February 1865. In earth-work 14,04,000 have been done in raising the inundated portions of the line, in filling in approaches to bridges, in making nearly two miles of new road, and in constructing 700 yards of bund along the Bor Nuddee to prevent it breaching a portion of the Road. This bund will likewise protect from inundation upwards of 1,000 acres of cultivated land over which the crops were destroyed last year.

3. In bridges, (besides culverts) 1,057 running feet of waterway, spanned with iron girders supported on timber piles, have been constructed. The Bor Nuddee 145 feet, and the Rungeah River 105 feet, are the largest. All the platforms are of 4-inch planking and safe for the heaviest waggons and even for elephants.

The following bridges are built solely of saul timber and wrought iron girders and will last for many years :—

Name of River.	Spans.	Width of bridge.	Length of bridge.
		Feet.	Feet.
Goramara Tee.	... Two of 17½' each ...	10	35
Kowarah River	... Ditto ...	10	35
Muddemkooree	... Six of 13' each ...	12	78
Gunga Bheel	... Ditto ...	12	78
Kumalpore River	... Ditto ...	12	78
	Running feet of bridges ...		304

5. The following bridges are built of best timber procurable, chiefly jack, with wrought iron girders and 4-inch planked platforms, and will last from four to five years :—

Name.	Spans.	Width.	Length.
		Feet.	Feet.
1. Moorooloah River ...	6 openings of 17½' each ...	10	105
2. Ditto ...	2 ditto 15' „ ...	10	30
3. Bor Nuddee ...	11 ditto 13' „ ...	10	143
4. Ditto ...	5 ditto 13' „ ...	10	65
5. Ditto ...	4 ditto 13' „ ...	10	52
6. Ditto ...	2 ditto 15' „ ...	10	30
and 3 culverts ...	ditto 15' „ ...	10	45
	Running feet of bridges ...		470

6. The following bridges are built of the best timber procurable in a country where no forest exist, and will probably require renewal after two years. No iron girders used. All these bridges now carry elephants :—

Name.	Spans.	Width.	Length.
		Feet.	Feet.
1. Goga Nuddee ...	6 openings of 10' each ...	10	70
2. Dijoolee ...	4 ditto 12' „ ...	10	54
3. Deemoolgah ...	4 ditto 12' „ ...	10	54
4. 6 smaller streams ...	1 ditto 13' „ ...	10	105
	Running feet of bridges ...		283

7. The reason that the best material was not used in all bridges was that the whole road had to be finished within two months to render communication between Gowhatty and the Frontier during the rains a matter of certainty ; with the limited Establishments at our command a sufficiency of saul timber could not be carried to the further end of the road, a distance of 30 miles from the saul forest. The 17½ feet and 13 feet plate girders proved of the greatest service. Indeed, without them we would not have succeeded in the undertaking.

8. The accounts are not quite made up ; but the actual cash expenditure will be under Rupees 17,000. There should however be a book debit of Rupees 7,907-2-10, for material and carriage supplied by the Executive Engineer Lower Assam Division, as his stock account will require to be relieved.

9. Taking the earth-work at the ordinary Assam rate of Rupees four and a half per thousand cubic feet, we have an expenditure of Rupees 6,318 upon it, and Rupees 18,682 upon bridges. This gives a ratio of Rupees 17-12 per foot forward, not including a few culverts of small dimensions.

10. It now only remains for me to bring prominently to the notice of the Lieutenant-Governor the excellent service performed by Mr. Martin, C. E., Executive Engineer, Lower Assam Division ; Lieutenant Samuells, Assistant Commissioner ; and Thakoor Doss, the Nazir of the Deputy Commissioner's Office, Kamroop. The two last Officers were most disinterestedly placed at my disposal by Colonel Hopkinson at a time when he could ill spare them. These Officers, with an energy and determination to conquer all difficulties, have suffered neither exposure nor fatigue to mar their success, and the result is most honorable to them. Mr. Martin's experience and knowledge of detail added weight and value to his natural determination of character, whilst Lieutenant Samuells' earnestness and desire to learn, made him a valuable Assistant.

11. Major Lloyd, the Deputy Commissioner, has well supported us with his influence and authority : and although some labour has been nominally impressed for the service of the road, yet I am confident, from the means adopted to see every man paid, and paid at a high rate, that the work has been as little distasteful to the impressed labourers as "forced labour" can be ; and to the volunteers, of whom there were many, decidedly popular.

From LIEUTENANT-COLONEL J. E. T. NICOLLS, R. E., Officiating Secretary to the Government of Bengal in the Public Works Department, to MAJOR D. BRIGGS, Superintendent of Works in Assam,—(No. 2301, dated the 4th May 1865.)

I AM directed to acknowledge the receipt of your letter, with enclosure, No. 3153, dated the 13th ultimo, reporting on the work done on the portion of the Bootan Road from Gowhatty to Koomreckhatta, which is reported to have been nearly completed on that date.

2. In reply I am desired to state that the Lieutenant-Governor considers that the result of the operations on the Road in question is extremely satisfactory, and is highly creditable to yourself and to the Officers whose services you have brought to the notice of Government in paragraph 10 of your letter, *viz.*, Mr. Martin, C. MANUFACTURE OF SALT.

I. Every application for a License to manufacture Salt under the provisions of Section VII. of Act VII. (B. C.) of 1864 shall be presented to the Board of Revenue, and shall specify the Zillah, Pergunnah, Village, and Place in which the applicant proposes to manufacture Salt.

II. The Board of Revenue shall have full power to approve or to reject any such application for the manufacture of Salt, and the orders of the Board shall be final.

III. Immediately upon any application for license to manufacture Salt being sanctioned, the applicant shall execute an agreement, and shall thereupon receive from the Board of Revenue a License, the currency of which shall not extend beyond one year.

IV. The Board of Revenue may appoint in each case such Excise Officers as they shall consider necessary to supervise the manufacture of Salt under such License as aforesaid, as well as its weighment, transportation, and storage, with a view to prevent smuggling and to protect the revenue. The names of all such Officers employed at any manufactory shall be notified to the owner or his Agent at the Salt works. Nothing in this Rule shall, however, be construed as interfering with the powers vested in Police Officers by Act VII. (B. C.) 1864.

V. The Board of Revenue shall determine the amount to be paid by each manufacturer of Salt for maintaining the necessary Excise Establishment, and the times and manner of payment.

VI. Should any manufacturer fall into arrears in making any such payment, the Board of Revenue may, if they think proper, cancel the License granted to such manufacturer, or stop all further manufacture, until payment of the full amount due be made.

VII. The manufacture of Salt shall be closed on such date as the Board of Revenue may be pleased to prescribe in each individual case, the date being specified in the License of each manufacturer. All Salt manufactured after that date shall be held to be Salt manufactured *without* a License, and the provisions of Sections V. and VI., Act VII. (B. C.) 1864 shall apply to such Salt and to its manufacturer. The License also shall be liable to be cancelled.

VIII. Within one month from the date of the closing of his manufacture every licensed manufacturer of Salt shall notify to the Board of Revenue the quantity of Salt manufactured by him during the season. Should the manufacturer, without sufficient cause, fail to give this information within the prescribed period, or should he wilfully furnish incorrect information, he shall be liable to a fine not exceeding Rupees 500, and in the latter case all Salt in excess of the quantity notified by him shall be held to be contraband, and shall be liable to seizure and confiscation as such. The License also shall be liable to be cancelled.

DEPOSIT OF SALT.

IX. The Board of Revenue may appoint the Collector of the District or other Officer specially selected for the purpose to exercise a general

control and supervision over all Warehouses provided by manufacturers of Salt under the requirements of Section X., Act VII. (B. C) 1864 The Board may also appoint subordinate Officers to the charge of any such Warehouse. No Warehouse shall be approved unless on measurement it be found capable of containing at least 10,000 maunds of Salt.

X. All Salt manufactured under Excise License which may remain unstored at the Salt works fifteen days after the date fixed in the License for the closing of the manufacture shall, unless the storage thereof shall have been unavoidably prevented, be destroyed by the Officers appointed under Rule IV

XI. Every Warehouse when approved of by the Board of Revenue shall be regularly licensed, and every manufacturer shall forthwith cause to be painted, or otherwise exhibited in a conspicuous part of the exterior of such Warehouse, the number of the License, the year in which it was granted, and the words "Licensed Warehouse" in the vernacular language and character of the District. The Board of Revenue may from time to time cause any licensed Warehouse to be inspected by the Collector of the District or other Officer appointed under Rule IX. and should it appear to the Board that from want of repair or from any other cause such Warehouse has become an unfit receptacle for the storage of Salt, may require the manufacturer to repair or otherwise render it fit for that purpose, and, in the event of his failing so to do, may cancel the License of such Warehouse.

XII. When a manufacturer desires to remove any Salt from his Salt works for the purpose of storing it, he shall cause it to be packed for transport in the presence of the Officer who may have been appointed to this duty under Rule IV. When ready for dispatch, such Officer shall carefully impress the Salt all over when packed in bulk with a wooden stamp (adul) supplied for the purpose; but when put up into bags, the mouth of every bag shall be closed with sealing wax and a seal, with a clear and distinct device affixed thereto, in not less than two places, and the aforesaid Officer shall also grant a Pass to protect the Salt during transit

XIII. The Pass shall specify the name of the manufacturer, the number of his License, the route by which the Salt is to be transported, and the date of dispatch. It shall also be numbered and signed by the Officer granting it.

XIV. A separate Pass shall be granted for every dispatch of Salt; but if it be dispatched by means of coolies or bullocks, one Pass shall be sufficient for every gang of coolies or drove of bullocks, and in such case, in addition to the particulars stated in Rule XIII. the pass shall specify the number of coolies or bullocks employed in carrying the Salt as well as the number of baskets, bags, or packs used.

XV. A copy of every Pass granted under the foregoing Rules shall be forwarded by the Officer granting it to the Collector of the District, or other Controlling Officer appointed under Rule IX.

XVI. The arrival at any licensed Warehouse of Salt dispatched from the Salt works shall at once be reported to the Officer in charge of the Warehouse, who shall, without delay, examine its condition, the state of the stamps or seals, as the case may be, and the Pass covering the Salt. The Pass shall then be forwarded in original, duly effaced and with the particulars noted in Rule XVIII. entered upon it, to the Collector of the District or other Controlling Officer appointed under Rule IX., and a copy shall be retained for record by the Officer in charge of the Warehouse.

XVII. If the Revenue Officer in charge of the Warehouse be satisfied that the Rules laid down above have been in no way infringed, he shall thereupon permit the manufacturer to store the Salt in the Wherehouse.

XVIII. If, however, on examination it be found that the dispatch of Salt has been tampered with, or that the quantity of Salt is likely to be more than one per cent. less than the quantity specified in the Pass, the Officer in charge of the Warehouse shall be empowered to seize and weigh the entire dispatch of Salt, and after recording the explanation of the manufreturer, or his duly accredited servant in charge thereof, he shall report the case to the Collector of the District or other Controlling Officer appointed under Rule IX. who shall transmit the papers, with his opinion on the case, for the orders of the Board of Revenue, who may direct confiscation of the entire dispatch as contraband. The Board may also, if they see fit, at once cancel the manufacturer's License The manufacturer shall further be liable for the amount of duty that would be leviable on the deficiency in excess of 1 per cent.

XIX. On obtaining the permission of the Officer in charge of the Warehouse the Salt shall be weighed and stored therein by the servants, and at the expense of the manufacturer, in the presence of such Officer and the result of such weighment shall be noted on the Pass protecting the Salt, as well as in the daily Store Account kept by the Officer in charge of the Warehouse.

XX. Every licensed Warehouse shall be secured by two padlocks supplied by the manufacturer on approval by the Officer in charge thereof, the key of one lock being retained by the person owning the Salt, or by some person on his behalf, and the key of the second lock by the Officer in charge of the Warehouse.

XXI. When a Warehouse shall have been stored with Salt, the manufacturer, owner or mortgagee of the Salt shall enter into a Bond for payment of the amount of duty, as well as other charges leviable thereon, and he shall further bind himself to discharge, without objection, any duty that may be adjudged against him by the Board of Revenue on account of any excess or penalty duty in consequence of any deficiency (beyond the usual allowance of two and a half per cent. as wastage) of Salt found in his Warehouse at the time of clearance.

XXII. No Bond shall be taken for a period exceeding three years, but on expiry of that period, with the sanction of the Board of Revenue, a renewed Bond may be executed for a further term of two years. Applications for the renewal of Bonds about to expire shall be presented to the Board of Revenue at least two months previous to their expiry.

XXIII. No Salt shall on any account be removed from a licensed Warehouse without the permission of the Board of Revenue, and any act in violation thereof shall subject the manufacturer, owner or mortgagee of the same to a penalty of Rupees 500, and the Salt thus removed shall be seized and confiscated. Provided that nothing in

this Rule shall be held to prevent Government proceeding, if it see fit, under Section XVI. of the Act.

XXIV. The Salt of the manufacture of each year shall be separately stored, and every act in violation of this Rule shall subject the whole of the Salt within the Warehouse to seizure and confiscation.

XXVIII. If any person who shall have become possessed of a Wholesale Rowannah shall desire to make any alteration in the terms specified therein, permissible under these Rules, he may, by application to the Board of Revenue on stamped paper of the value prescribed for petitions to the said Board, obtain an Exchange Rowannah, which shall, for all the purposes of the Act and of these Rules, be considered to be a Wholesale Rowannah.

XXIX. * Atrafee Rowannah.

XXXI. Wholesale Rowannah holders are hereby empowered to issue to Furriahs or retail vendors Retail Rowannahs of both the descriptions specified in Rule XXV. and holders of Retail Rowannahs, No. 1, are similarly empowered to issue Retail Rowannahs, No. 2, to Furriahs or retail vendors.

Salt conveyed into the limits notified under Section XII. of the Act from Ships or Warehouses in Calcutta and Howrah, will require to be protected by a special Rowannah.

XXXIII. Every Wholesale and every Retail Rowannah shall always be kept with the Salt to which it refers, and on demand by any Police Officer above the rank of Constable shall be forthwith produced for examination. When, however, under the provisions of the Rule next following, a dispatch of Salt covered by a Wholesale or Retail Rowannah is laden on more than one boat, or cart, or drove of bullocks, or gang of coolies, it will be sufficient if the Wholesale or Retail Rowannah covering the entire dispatch of Salt be produced within twenty-four hours.

Such Chellans shall be given up when the Salt of the dispatch has to pass out of the limits notified under Section XII. of the Act, or is transferred to other boats, carriages, &c. A Chellan, therefore, can never protect Salt in itself, or independently of the Rowannah to which it is merely subsidiary.

XXXV. If any person in charge of Salt shall fail to comply with the provisions of Section XXII. of the Act, the owner of such Salt shall be liable to fine not exceeding Rupees 500.

XXXVI. Any person in charge of Salt in transit within the limits notified under Section XII. of the Act shall be bound to stop at every Police Pass Station upon the line of route laid down in his Rowannah, whether Wholesale or Retail, and shall present his Rowannah to the Chief Officer at such Station for endorsement, and shall, if required, allow his Salt to be examined.

XXXVII. The proprietor of any Salt the Rowannah of which shall not be endorsed in the manner prescribed in the preceding Rule, shall be liable to a fine not exceeding Rupees 500; and if it shall appear to the Officer trying the case that the omission was made with fraudulent intent, he shall direct the Salt to be confiscated.

XXXVIII. The names of the Police Pass Stations at which it will be necessary for proprietors of Salt to have their Salt and Passes examined and endorsed, shall be notified, from time to time, in the *Calcutta* and *Exchange Gazettes*.

XXXIX. On a dispatch of Salt covered by a Rowannah arriving at the Warehouse or Shop of any Salt trader situated in any place within the limits notified in Section XII. of the Act, the proprietor shall within twenty-four hours notify its arrival in writing to the Collector of the District, specifying in such notice the number and date of the Rowannah, the quantity and description of Salt covered by it, and the place whence the Salt was obtained. Omission or neglect to comply with this Rule shall render such trader liable to a penalty not exceeding Rupees 10 for each offence.

XL. Every Salt trader carrying on business within the limits notified under Section XII. of the Act shall, on the 1st of every month, submit to the Collector of the District a signed Statement in duplicate, specifying the quantity of Salt sold under each document in his hands during the previous month, as well as the quantity of Salt remaining in store under each such document on the last day of such month. Omission or neglect to comply with this Rule shall subject such trader to a fine of Rupees 20 for each offence.

XLI. The Board of Revenue shall, from time to time, prescribe forms for the Agreements, Applications, Bonds, Licenses, Rowannahs, and other Documents required under the above Rules.

No. 178.

The 4th May 1865.

The following Draft of Rules having reference to the Canals from Ooloobaria to Midnapore and from the Roopnarian River to Balasore, called respectively the Midnapore Canal *and the* Balasore Canal, *is published for information under the provisions of Section XI. of "the* Canals' Act, 1864,"—*(No. V., B. L. C.)*

I. Every Vessel on entering either of the above Canals shall be liable to measurement for the purpose of ascertaining the amount of toll the Vessel should pay according to the Schedule of rates authorized by Government to be charged on the Canal.

II. The tonnage of every Vessel, whether laden or empty, shall, for the purposes of the "Canals' Act, 1864," and of these Rules, be determined by the following measurements :—

a. The product of half the length of the Vessel from stem to stern measured along the water line, multiplied by the interior greatest breadth of the Vessel, multiplied by the depth from the water line to the bottom of the Vessel, is to be taken as the number of maunds upon which toll shall be levied.

b. The measurement of the length is to be made in feet rejecting inches, and the measurment of the breadth and depth in feet and quarters of feet rejecting portions of less than a quarter of a foot.

c. In calculating the amount of toll to be levied any fraction of 100 maunds less than 25 maunds is to be omitted; exceeding 25 and not

exceeding 50 maunds is to be charged as 25 maunds only; exceeding 50 and not exceeding 75 maunds to be charged as 50 maunds only; and exceeding 75 maunds as 75 maunds only. Above one thousand maunds no fraction of 100 maunds is to be charged

III. Every Vessel entering a Canal shall be furnished with a ticket on paying the prescribed toll. The ticket shall specify the Station at which it has been issued, the name of the person in charge of the Vessel, the date the Vessel entered the Canal, the point to which it may proceed in the Canal, the maundage of the Vessel, the amount of toll charged, and the number of days for which the Vessel may remain in the Canal, and the date of such last day. The number of days which the Vessel may remain in the Canal without additional payment shall be calculated at the rate of one day for every eight miles or portion of eight miles to be traversed.

IV. Toll may be paid at the first Station either for the entire number of Toll Stations on the line of navigation, or for any less number of Stations.

V. The tickets thus given may be demanded for inspection by any duly authorized Canal Officer, and must be kept on board and at hand for that purpose. They must be shewn at each Toll Station the Vessel has to pass as a Passport that no further payment of toll is to be demanded. The tickets shall be delivered up at the last Toll Station.

VI. Owners of Vessels may compound by the payment of a fixed sum for the use of the whole or a portion of a Canal for any period that may be agreed upon, not exceeding one year. Each Vessel so compounded for shall be furnished with a ticket shewing the amount of toll paid, the period for which the toll has been compounded for, and the limits of the Canal within which the Vessel may pass; such ticket shall be kept on board the Vessel and shall be produced when required under Rule IV, but shall be given up only on the date of the expiry of the period for which granted and at the Station from whence issued.

VII. Duplicates of lost tickets, of which the numbers and the dates of entry can be satisfactorily established, will be granted by Officers in charge of Toll Stations on payment of a fee of one Rupee.

VIII. Vessels remaining in the Canal for a period exceeding that allowed under Rule III. will pay a demurrage of eight annas per 100 maunds per diem for each day or part of a day that they may remain in excess.

IX. No boats above 18 feet beam over all, and no rafts or floats of more than 10 feet width and 150 feet in length will be allowed to enter the Canal.

X. It will not be compulsory for the locks to be opened to single Vessels of less than 500 maunds burden, except in the case of mail or dispatch boats; but the locks shall be opened for the passage of boats at least twice a day.

XI. Vessels must have their masts fitted so that they can be let down with ease and speed, and when under sail Vessels must always keep in the middle of the Canal; when being tracked Vessels are, as far as practicable, to keep to their port or left side of the Canal.

XII. All Vessels anchoring at night are to keep to their port or left bank of the Canal.

XIII. Only one Vessel shall be allowed to make fast along and in a line with the Canal banks, and no Vessel shall be made fast, or be placed outside of Vessels so secured without the permission of a Canal Officer. No Vessel shall, however, be placed in such a position as to endanger the safety of other Vessels, to obstruct their passage, or to impede the navigation; and no bamboos or poles shall be allowed to be erected on Vessels when at anchor: any infringement of this rule will be punishable by a fine not exceeding Rupees 5 for each offence.

XIV. Every Vessel when put to shall be securely fastened and shall at all times have some person in attendance on board of it: any infringement of this rule will be punishable by a fine not exceeding Rupees 5 for each offence.

XV. In every case of wreck or obstruction of the channel by sunken Vessels, the Canal Officer may call upon the person in charge of the Vessel to remove the same without delay, and shall give every reasonable assistance towards so doing. But should the owner of the Vessel or raft be not forthcoming, or should he not use reasonable expedition in removing the obstruction, or should he decline or fail to use proper assistance which may be offered to him by the Canal Officers, these Officers may undertake the removal of the obstruction themselves at the cost of the owner of the boat, recovering the expense in the manner laid down in Section IX. of "the Canals' Act, 1864."

XVI. If the Canal Officer be unable to ascertain the name and place of business or of abode of the owner of the cargo of any Vessel or Boat seized under the Canals' Act, he shall notify the seizure in the most public manner available.

XVII. The banks or berms of the Canals shall not be used as wharves for the deposit of goods under a penalty of 10 Rupees for each offence; but except in special cases, when the permission of the Canal Officers will be necessary, all articles shall be removed to the outer bank of the Canal and all such articles as shall not be finally removed from within the Canal boundaries within a period of 6 days after being so deposited shall be liable to a charge of four annas per 100 maunds.

XVIII. The Canal may be closed once a year for effecting the necessary repairs to it on one month's notice of the intention so to close it, but in the event of any sudden emergency the Canal, may be closed at any time without prior notice, and no claim shall be made in such case by owners of Vessels or others for compensation on account of detention.

XIX. All offences against the provisions of these Rules shall be punishable as provided for in Section XVIII. of the Canals' Act, 1864, and all fines imposed may be recovered in the manner mentioned in Section XVII. of the same Act.

XX. The term "Canal Officer" in the foregoing Rules shall include the persons alluded to in Section VIII. of "the Canals' Act, 1864," and any other persons who may be specially appointed to exercise such powers by the person appointed to collect the tolls.

The following Notice is published for general information :—

COASTS OF BRITISH BURMAH.

Alguada Reef Lighthouse.

Notice to Mariners.

A First Class Revolving Light was exhibited, for the first time, from the Alguada Reef, in the Bay of Bengal, on the night of the 23rd April 1865, and will continue to be shewn from that date.

The light, which is 144 feet above H. W. mark, attains its greatest brilliancy once a minute, and is visible, in clear weather, 20 nautical miles from the poop of a large ship.

Cape Negrais bears from the Lighthouse N. ¼ W.

The Pagoda on Pagoda Point N. ¾ E.

Porian Point N. E. by N.

The centre of Dimond Island N. N. E.

Vessels approaching the Alguada Reef will still find it necessary to be careful. The tides, when influenced by the wind, set across the Reef, and with a good deal of strength between the Reef and the Phæton Shoal. Vessels, therefore, should not come under 20 fathoms on the North-Western side, as the water shoals suddenly on this side, especially towards the South-West part of the Rocks.

Fifteen fathoms will be a safe depth to pass in on the Southern and Eastern sides.

There is a good channel to the North of the Reef between it and the Phaeton Shoal; but the navigation must always be attended with some risk to those unacquainted with it, there being no plain marks that can be specified as a safe and sure guide through. Should, however, circumstances compel a vessel to go through the Northern Channel, it will be well to borrow on the Alguada Reef side, passing about half a mile distant from the North-Easternmost visible rock, and not coming under 11 fathoms. Should it be high water, the breakers will shew the rocks.

On the Eastern side of the Reef vessels may know they are clear of danger by keeping the high land of Heingyee (or Negrais Island) well open to the Eastward of the Diamond Island.
